21 July 2006

Dear Sir/Madam

RE: COT REPORT

It has come to my attention the CTFC has indicated it may stop publishing the COT Report.

As an individual trader, I rely heavily on the COT report to assist me in making trading decisions – both with respect to the specific markets reported and also as a form of leading indicator for others.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may benefit from modification, the number and size of exemptions granted by the Commission would indicate benefits in more transparency, not less. Any changes should not result in discontinuing, suspending or delaying, the COT report, and the Commission should implement any report changes in a way that maintains the integrity and continuity of historical data. Without a historical reference, the report becomes practically unusable.

PLEASE ALSO CORRECT THE HEDGER DATA

7/24/2006

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for traders and investors throughout the world.

I thank you and trust you will continue to keep our markets transparent with full disclosure to the public.

Yours faithfully,

A handwritten signature in black ink, appearing to read "S. R. Monk". The signature is fluid and cursive, with a long horizontal stroke at the end.

Subject: COT reports

In response to your request for comments, I am deeply concerned that the CFTC would consider discontinuing such a popular and insightful report. While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any modification must avoid discontinuing, suspending, or delaying, the Commitments reporting. And the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible. My specific responses to your numbered inquiries are as follows:

1. As an individual trader, I use the COT report to alert me to sudden position changes that would indicate a reversal in sentiment by a particular trader group. I also look at total positions against their historical ranges to identify sentiment extremes among the various trader groups.
 - a. The size of the commercial long and short totals, as well as the ratio of these, is useful in discovering extremes or significant changes in sentiment within the "trade." Historically, large one-sided positions among commercial traders has indicated a potential price trend change in the direction of the commercial position. Likewise, resumption in major trends often follow a large change in commercial buying or selling patterns.
 - b. Non-commercial large traders have historically shown a preference for momentum trading strategies and, thus, provided the buying power in bull trends and the selling power in bear trends. I look for a trend to accelerate in the direction of predominant one-sided large speculator

7/24/2006

trading. I anticipate declining large speculator participation and am alert for potential trend reversals when their positions approach historical long or short extremes.

c. In uptrends, the extent that large non-commercial traders are willing to bid forward futures prices to a premium over normal carrying charges gives me an indication of the potential strength and longevity of bullish conditions. In downtrends, momentum selling usually results large speculators holding shorts and net short positions near their historical extremes at price bottoms in both futures and cash prices.

2. The Haig working paper on the CFTC website lists 41 related scholarly works, many apparently using COT data, and this is probably not a comprehensive list.
3. Market transparency is the antithesis of manipulative advantage, and the COT report makes US futures the most transparent of any exchange in the world. Do traders change their tactics based on date in the COT report? If they do, those reactions are promptly reported in next week's issue. This self correcting feature is unusual in a potentially market-moving report.
4. The Commission must continue publishing the CoT report.
5. Since the large traders are not identified, only the Commission can judge the need for additional trader categories. It is difficult to understand the distinction the Commission draws between non-commercials and non-traditional commercials. Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can apparently operate without limits and the futures position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission does not view these as equivalent speculative (non-commercial) positions, than I would prefer to see it listed under a separate category and reserve the commercial category for traditional hedgers.
6. The COT report is not the only source of information regarding the potential size and timing of investment fund rolls. Even if it were, the market would soon arbitrage out any unfair advantage. Transparency is the antithesis of manipulative advantage.
7. a. The COT report is not the sole source of trader information. In fact many of these entities report their positions on SEC reports. For the CFTC to quit disclosing aggregate homogeneous positions would actually tilt the playing field in favor of large players who have the resources to aggregate this information from other sources.

b. Insiders don't need to "guess" the identity or position totals. They can get actual names from SEC and other (less public) sources and deduce futures position sizes from equity reports and broker contacts. By publishing factual aggregate totals, the Commission only levels the playing field to the disadvantage of potential manipulators who access inside or non-public sources.

c. The Commission has already increased the threshold number of reportable traders needed to publish Commitments data from 4 to 20. The Commission has to balance this perceived need for privacy of individual trading concerns against the benefits of transparency. It seems to me that a market's susceptibility to manipulation is inversely related to the number of large trader participants. Publishing the aggregate totals in the COT report is the antidote, not the poison.
8. & 9. For simplicity, categories should be consistent for all markets. If the total for a particular category in a particular market is zero, it doesn't take much effort to place it there. This provides flexibility to the Commission in future trader classification. As the Commission points out, the derivatives landscape is constantly changing and new products and non-traditional participants may be just around the corner for any market. And it is conceivable that a future Commission might use a different categorization protocol and categorize positions based on the source of the funds rather than the current practice, which apparently ignores the original source and purpose of the position.
10. Users of the COT report have benefited with each and every increase in reporting frequency. Less frequent partial reports create doubt, cloud transparency, and can't help anyone besides inside players.
11. Reportable traders are already required to report speculative positions separate from "bona fide hedges." This is not a hardship, particularly in the case of these large traders, whose reporting is automated.

Finally, I would request that if the Commission should decide to make changes that could negatively affect the continuation, continuity, or promptness of the COT report, that it submit such proposed changes for further specific public comment.

Subject: COT report

Ms. Donovan,

Please do not eliminate the COT reporting. I am just an individual investor trying to avoid "bad" investment advice from newsletter writers that do not pay attention to the COT data. In the process of trying to figure out if there was a way to avoid the stock market meltdown in the year 2000, I noticed that the COT data would have given me a reason to question some of the advice that was out there for public consumption. I personally know people who say they lost approximately 50% of their retirement money due to such "bad" advice. Yes, I am aware that they were responsible for their individual investment decisions. However, without factual information like the COT data there will be little or no chance for the public to be able to make informed decisions about such matters. Transparency is (I believe) one of the hallmarks of a properly functioning free market. I would much rather see the COT data reported daily than to see COT reporting eliminated!

1. What types of traders in the futures and option markets use the COT reports in their current form, and how are they using the COT data?

More specifically:

(a) How do traders use the COT information on commercial positions?

I watch the difference between the "commercial" and "non-commercial" positions.

(b) How do they use the COT information on non-commercial positions?

I watch the difference between the "commercial" and "non-commercial" positions.

(c) In particular, with respect to information on non-commercial positions, what information or insights do traders gain from the COT reports regarding the possible impact of futures trading on the underlying cash market?

This is not something I try to determine.

2. Are other individuals or entities (academic researchers or others) using the COT reports and, if so, how?

3. Do the COT reports, in their current form, provide any particular segment of traders with an unfair advantage?

The COT reports provide the commercial and large traders with at least a week's delay of privacy. I consider that somewhat unfair to the public.

4. Should the Commission continue to publish the COT reports?

Yes.

5. If the Commission continues to publish the COT reports, should the reports be revised to include additional categories of data—for example, non-traditional commercial positions, such as those held by swap dealers?

I am not qualified to comment.

6. As a general matter, would creating a separate category in the COT report for "non-traditional commercials" potentially put swap dealers or other non-traditional commercials at a competitive disadvantage (since other market participants would generally know that their positions are usually long, are concentrated in a single futures month, and are typically rolled to a deferred month on a specific schedule before the spot month)?

I am not qualified to comment.

7. More specifically, if the data in the COT reports are made subject to further, and finer, distinctions, such as adding a category

for non-traditional commercials:

(a) Would it increase the likelihood that persons reading the reports would be able to deduce the identity of the position holders, or other proprietary information, from the reports?

Probably.

(b) Could such persons use information gleaned from the reports to gain a trading advantage over the reported position holders?

Probably.

(c) In such case, in order to reduce the likelihood of publishing categories with few traders, which might provide information giving other traders a competitive advantage over the reported traders, should the Commission consider raising the threshold number of reportable traders needed to publish data for a market from 20 traders to some larger number of traders?

No.

8. If the data in the COT reports are made subject to further, and finer, distinctions, should the reports be revised for all commodities, or only for those physical commodity markets in which non-traditional commercials participate?

All. Any inconsistency will attract the same issues you are attempting to address today.

9. If a non-traditional commercial category were added to markets in physical commodities, what should be done with financial commodities, where "non-traditional commercials" would be essentially an empty category (since, in financial commodities, swap dealers would fall within the pre-existing "commercial" category)?

If "swaps" cannot be broken out, just leave the category empty.

10. The Commission has observed that the non-traditional commercials tend to be long only and tend not to shift their futures positions dramatically--even in the face of substantial price movements. If the data in the COT reports are made subject to further, and finer, distinctions, would issuing the additional data on a periodic basis, in the form of a quarterly or monthly supplement, be sufficient?

I am not qualified to comment.

11. Some reportable traders engage in both traditional (physical) and non-traditional (financial) commercial activity in the same commodity market. If the data in the COT reports are made subject to further, and finer, distinctions, such traders would have to break out their non-traditional commercial OTC hedging activity into a separate account. Would such a requirement represent an undue burden to those traders?

Yes, it would increase their burden. "Undue"? It would be difficult to convince me that the requirement would be "undue".

Subject: COT Report

I trade futures both for myself and for my company. The CFTC's COT report is indispensable for my trading strategies.

The Federal Register Notice on the CFTC web site indicates that the CFTC may consider discontinuing the COT reports. As a trader who uses them, I request that you drop this possibility from consideration immediately.

The Federal Register notice also asks several questions which I can attempt to answer from my point of view, if it will help.

1. What types of traders in the futures and option markets use the COT reports in their current form, and how are they using the COT data?

I am a private speculator who trades futures and options, and I use the COT report in its current form.

More specifically:

(a) How do traders use the COT information on commercial positions?

Generally I use only the "commercials" data, and compare it with other sentiment indicators to gauge how I should bias my trades.

(b) How do they use the COT information on non-commercial positions?

I have used this as a supplementary market sentiment indicator.

(c) In particular, with respect to information on non-commercial positions, what information or insights do traders gain from the COT reports regarding the possible impact of futures trading on the underlying cash market?

Knowing something about commercial activity is valuable. If the commercials seem unusually biased toward long or short, there is an underlying reason for it. Most commercials actually deal in the underlying physical commodities, so their futures positions serve as a rough indicator of where they see risk.

2. Are other individuals or entities (academic researchers or others) using the COT reports and, if so, how?

I have performed academic research using COT reports as well.

3. Do the COT reports, in their current form, provide any particular segment of traders with an unfair advantage?

NO. Bluntly, this is a STUPID question. They reports are freely available to everybody. Any trader who needs it can access it.

4. Should the Commission continue to publish the COT reports?

YES!

5. If the Commission continues to publish the COT reports, should the reports be revised to include additional categories of data--for example, non-traditional commercial positions, such as those held by swap dealers?

I think it would be helpful for that particular category to be separated from the traditional commercial positions category.

6. As a general matter, would creating a separate category in the COT report for "non-traditional commercials" potentially put swap dealers or other non-traditional commercials at a competitive disadvantage (since other market participants would generally know that their positions are usually long, are concentrated in a single futures month, and are typically rolled to a deferred month on a specific schedule before the spot month)?

I cannot see why a large non-traditional commercial entity, who is required to report activities to the CFTC, deserves its activities to be treated as anything but public information. These entities would not be named in the COT report, so I don't see the harm in creating a separate category.

It may be valuable enough for individual traders to have this separate category, that the CFTC may get flooded with FOIA requests each and every week to provide this. Therefore, now that the CFTC has made me and the rest of the public aware of the capability to create this category, it would be in the CFTC's interest to do so. Do you really want to deal with constantly answering FOIA requests?

7. More specifically, if the data in the COT reports are made subject to further, and finer, distinctions, such as adding a category for non-traditional commercials:

(a) Would it increase the likelihood that persons reading the reports would be able to deduce the identity of the position holders, or other proprietary information, from the reports?

Not if the category included at least a dozen or so non-traditional commercial entities.

(b) Could such persons use information gleaned from the reports to gain a trading advantage over the reported position holders?

Aren't commodity funds required to disclose their positions also? If so, why would more transparency create problems, especially if the CFTC reports aggregate data from a dozen or so different entities?

(c) In such case, in order to reduce the likelihood of publishing categories with few traders, which might provide information giving other traders a competitive advantage over the reported traders, should the Commission consider raising the threshold number of reportable traders needed to publish data for a market from 20 traders to some larger number of traders?

A threshold of 20 seems high enough. It is conceivable that this threshold should be lowered if, say, 15 of those 20 create unrealistic variations in the traditional commercials category.

8. If the data in the COT reports are made subject to further, and finer, distinctions, should the reports be revised for all commodities, or only for those physical commodity markets in which non-traditional commercials participate?

I would like to see the report revised for all commodities. I do not know in which markets the non-traditional commercials participate. Further, you cannot predict which markets they will expand their activities into in the future.

9. If a non-traditional commercial category were added to markets in physical commodities, what should be done with financial commodities, where "non-traditional commercials" would be essentially an empty category (since, in financial commodities, swap dealers would fall within the pre-existing "commercial" category)?

The question seems to answer itself: leave the financials as they are.

10. The Commission has observed that the non-traditional commercials tend to be long only and tend not to shift their futures positions dramatically--even in the face of substantial price movements. If the data in the COT reports are made subject to further, and finer, distinctions, would issuing the additional data on a periodic basis, in the form of a quarterly or monthly supplement, be sufficient?

Quarterly releases would not be useful to anyone but academic researchers. Additional data should be released with every new COT report.

11. Some reportable traders engage in both traditional (physical) and non-traditional

(financial) commercial activity in the same commodity market. If the data in the COT reports are made subject to further, and finer, distinctions, such traders would have to break out their non-traditional commercial OTC hedging activity into a separate account. Would such a requirement represent an undue burden to those traders?

I am not one of those traders, so I cannot answer this.

OFF. OF THE SECRETARIAT

Dear Sirs

I live in Australia and trade many instruments in many markets.

COMMENT

(I was appalled at the cessation of the M3 reporting - extremely limiting of vital information, for supposedly free markets, free market forces, in a supposedly free country.)

Now, you propose to limit the COT information!

What next? Complete socialization of markets?

I protest intensely at this proposed move - please leave things as they are, or better yet, bring back M3 information.

We already have enough corrupt practices invading and involving our free markets, without covertly providing the tools for more corruption and cheating, which equates to corporate larceny - to put it simply, stealing (legally they think, immorally I say, and unethically) from those who do not have this information.

Money talks, and big money shouts.

Look at how stacked the deck is:

1. Massive Insider back dating of options
2. Massive Insider selling of stocks while buying back shares for the public to meet EPS requirements
3. Three day delays in COT reports (reports that insiders do not want the public to see at all)
4. Elimination of M3 reporting
5. Short interest stats that come out so infrequently as to be useless
6. Upgrades at the top and downgrades at the bottom
7. Upgrades and downgrades after mutual funds have bought in or sold
8. Debt rating changes happen only after they are totally expected (GM, Ford)
9. Debt rating companies have side business relationships with companies they rate
10. Upgrades and downgrades of stocks during options expiration week and other less liquid times for maximum effect

Obviously I am unable to prove any of the above "Stacked Deck" points, and neither do I accuse anyone.

But isn't that the scam? Keep others in the dark while you steal their money, and only afterwards make the information available so that they are then able to determine their loss?

We do things differently in Australia - we do not have such corrupt practices in the name of a free and

7/24/2006

democratic system.

Democratic is what democratic does, not just a cliché to spin off when convenient.

How is Joe Public expected to remain a participant in this?

Australia is the true land of the free.

Do what you have to do, but I submit my request to retain the COT report.

Yours faithfully

COT reports comment (7/20/06) in response to:

[Federal Register: June 21, 2006 (Volume 71, Number 119)]
[Notices] [Page 35627-35632]

COMMENT

Summary:

The COT report is a vital tool for the free market trader. I use it every day when considering trades. It is among the most useful data the government puts out because it comes out weekly rather than monthly or quarterly, and because it has had fewer distortions and adjustments than the Labor and CPI reports.

By providing key market info like the COT report, the CFTC helps maintain a level marketplace and the integrity of the futures market. If the COT report were to be discontinued or significantly altered to mask disclosure, a dark fog would envelop America's financial and commodity markets. Without the information currently provided by the COT report, market participants would be forced to face more risk and probably more volatility in the markets.

Questions... addressed individually:

1. What types of traders in the futures and option markets use the COT reports in their current form, and how are they using the COT data? More specifically:
(a) How do traders use the COT information on commercial positions?
(b) How do they use the COT information on non-commercial positions?
(c) In particular, with respect to information on non-commercial positions, what information or insights do traders gain from the COT reports regarding the possible impact of futures trading on the underlying cash market?

***Individual trader for his own account uses the COT data weekly to analyze the changing patterns of commercial, non-commercial, and non-reportable commitment to the various markets. The current patterns are compared to historical situations (often very different for different markets) in order to ascertain the strength of a trend in prices.
(c) sometimes non-commercial price preferences are seen to be uncorrelated to the underlying market fundamentals.

2. Are other individuals or entities (academic researchers or others) using the COT reports and, if so, how?

***Individual, ongoing private research.

3. Do the COT reports, in their current form, provide any particular segment of traders with an unfair advantage?

***Generally, no, since the information is available freely to all. However, there may be some fairly large commercial and non-commercial outfits which fall below the reporting thresholds and therefore have a little more cover and less paperwork than those with a larger position.

4. Should the Commission continue to publish the COT reports?

*** Yes.

5. If the Commission continues to publish the COT reports, should the reports be revised to include additional categories of data--for example, non-traditional commercial

positions, such as those held by swap dealers?

***Perhaps, but based on what the Commission presented above, and my own regular use of the COT report, it does not seem necessary.

6. As a general matter, would creating a separate category in the COT report for "non-traditional commercials" potentially put swap dealers or other non-traditional commercials at a competitive disadvantage (since other market participants would generally know that their positions are usually long, are concentrated in a single futures month, and are typically rolled to a deferred month on a specific schedule before the spot month)?

***It's possible, and those affected will swear it is so, but maybe not.

7. More specifically, if the data in the COT reports are made subject to further, and finer, distinctions, such as adding a category for non-traditional commercials:

(a) Would it increase the likelihood that persons reading the reports would be able to deduce the identity of the position holders, or other proprietary information, from the reports?

(b) Could such persons use information gleaned from the reports to gain a trading advantage over the reported position holders?

***In most cases, the large entities know who is doing what already, and the proposed category may only help in confirming that to them.

(c) In such case, in order to reduce the likelihood of publishing categories with few traders, which might provide information giving other traders a competitive advantage over the reported traders, should the Commission consider raising the threshold number of reportable traders needed to publish data for a market from 20 traders to some larger number of traders?

***Keep the threshold number of reportable traders needed to publish data for a market at 20 traders (or even lower).

Better to forget about the finer distinctions than to raise it.

8. If the data in the COT reports are made subject to further, and finer, distinctions, should the reports be revised for all commodities, or only for those physical commodity markets in which non-traditional commercials participate?

***Only for those physical commodity markets in which non-traditional commercials participate.

9. If a non-traditional commercial category were added to markets in physical commodities, what should be done with financial commodities, where "non-traditional commercials" would be essentially an empty category (since, in financial commodities, swap dealers would fall within the pre-existing "commercial" category)?

***Add a category for government and quasi-governmental agencies. (joke)

10. The Commission has observed that the non-traditional commercials tend to be long only and tend not to shift their futures positions dramatically--even in the face of substantial price movements. If the data in the COT reports are made subject to further, and finer, distinctions, would issuing the additional data on a periodic basis, in the form of a quarterly or monthly supplement, be sufficient?

***Weekly reports have proved to be most useful, and if additional data were only provided on a less frequent schedule, how would anyone know in what week the shift occurred?

11. Some reportable traders engage in both traditional (physical) and non-traditional (financial) commercial activity in the same commodity market. If the data in the COT reports are made subject to further, and finer, distinctions, such traders would have to break out their non-traditional commercial OTC hedging activity into a separate account. Would such a requirement represent an undue burden to those traders?

***In this day of computerized bookkeeping and numbers crunching in all directions, it's hard to imagine that there is any technical burden at all to provide this data since a

well run office should have these facts at hand already.

Have a nice day!

Email: secretary@cftc.gov

Subject: COT reports

In response to your request for comments, I am deeply concerned that the CFTC would consider discontinuing such a popular and insightful report. While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any modification must avoid discontinuing, suspending, or delaying, the Commitments reporting. And the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible. My specific responses to your numbered inquiries are as follows:

1. As an individual trader, I use the COT report to alert me to sudden position changes that would indicate a reversal in sentiment by a particular trader group. I also look at total positions against their historical ranges to identify sentiment extremes among the various trader groups.
 - a. The size of the commercial long and short totals, as well as the ratio of these, is useful in discovering extremes or significant changes in sentiment within the "trade." Historically, large one-sided positions among commercial traders has indicated a potential price trend change in the direction of the commercial position. Likewise, resumptions in major trends often follow a large change in commercial buying or selling patterns.
 - b. Non-commercial large traders have historically shown a preference for momentum trading strategies and, thus, provided the buying power in bull trends and the selling power in bear trends. I look for a trend to accelerate in the direction of predominant one-sided large speculator trading. I anticipate declining large speculator participation and am alert for potential trend reversals when their positions approach historical long or short extremes.
 - c. In uptrends, the extent that large non-commercial traders are willing to bid forward futures prices to a premium over normal carrying charges gives me an indication of the potential strength and longevity of bullish conditions. In downtrends, momentum selling usually results large speculators holding shorts and net short positions near their historical extremes at price bottoms in both futures and cash prices.

7/24/2006

2. The Haig working paper on the CFTC website lists 41 related scholarly works, many apparently using COT data, and this is probably not a comprehensive list.
3. Market transparency is the antithesis of manipulative advantage, and the COT report makes US futures the most transparent of any exchange in the world. Do traders change their tactics based on data in the COT report? If they do, those reactions are promptly reported in next week's issue. This self correcting feature is unusual in a potentially market-moving report.
4. The Commission must continue publishing the CoT report.
5. Since the large traders are not identified, only the Commission can judge the need for additional trader categories. It is difficult to understand the distinction the Commission draws between non-commercials and non-traditional commercials. Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can apparently operate without limits and the futures position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission does not view these as equivalent speculative (non-commercial) positions, than I would prefer to see it listed under a separate category and reserve the commercial category for traditional hedgers.
6. The COT report is not the only source of information regarding the potential size and timing of investment fund rolls. Even if it were, the market would soon arbitrage out any unfair advantage. Transparency is the antithesis of manipulative advantage.
7. a. The COT report is not the sole source of trader information. In fact many of these entities report their positions on SEC reports. For the CFTC to quit disclosing aggregate homogeneous positions would actually tilt the playing field in favor of large players who have the resources to aggregate this information from other sources.
 b. Insiders don't need to "guess" the identity or position totals. They can get actual names from SEC and other (less public) sources and deduce futures position sizes from equity reports and broker contacts. By publishing factual aggregate totals, the Commission only levels the playing field to the disadvantage of potential manipulators who access inside or non-public sources.
 c. The Commission has already increased the threshold number of reportable traders needed to publish Commitments data from 4 to 20. The Commission has to balance this perceived need for privacy of individual trading concerns against the benefits of transparency. It seems to me that a market's susceptibility to manipulation is inversely related to the number of large trader participants. Publishing the aggregate totals in the COT report is the antidote, not the poison.
8. & 9. For simplicity, categories should be consistent for all markets. If the total for a particular category in a particular market is zero, it doesn't take much effort to place it there. This provides flexibility to the Commission in future trader classification. As the Commission points out, the derivatives landscape is constantly changing and new products and non-traditional participants may be just around the corner for any market. And it is conceivable that a future Commission might use a different categorization protocol and categorize positions based on the source of the funds rather than the current practice, which apparently ignores the original source and purpose of the position.
10. Users of the COT report have benefited with each and every increase in reporting frequency. Less frequent partial reports create doubt, cloud transparency, and can't help anyone besides inside players.
11. Reportable traders are already required to report speculative positions separate from "bona fide hedges." This is not a hardship, particularly in the case of these large traders, whose reporting is automated.

Finally, I would request that if the Commission should decide to make changes that could negatively affect the continuation, continuity, or promptness of the COT report, that it submit such proposed changes for further specific public comment.

CFTC OFFICE OF SECRETARY

Greetings:

As an individual trader, I rely heavily on the COT report to assist me in making market decisions. It is a major input into the decision to enter the market.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

7/21/2006

Thank you for keeping our markets transparent with full disclosure to the public.

Comments on COT Reports as per Federal Register June 21 2006-07-24

Some answers to your questions:

1. The COT data is reviewed each week and is one of the key input into some market transparency. We use it as a key trading input.
2. We use the COT report as a key input to our market analysis (see attached report) and so do most market analyst
3. We do not believe that the COT report provides any trader with an unfair advantage
4. We think that it is imperative that the Commission continues to publish the COT report. This report is the most important input in regard to market transparency and stability of the market. We think the Commission should pressure other markets (ie Intercontinental Exchange –ICE-) to publish similar data.
5. We think that the Commission should revise the reports to publish positions held by Swap dealers as well as Commodity Indexes. The most important development in the market recently has been the launching of many new commodity indexes (such as the Goldman Sachs GSCI) and such positions should be treated separately and not included in the “commercial” section.
6. We do not think that it will put them at a competitive disadvantage as the information can be re-couped separately
7. Due the increase of such non-traditional commercials we do not think we could be able to deduce the identity of the positions holders, they are now too numerous companies involved (and why it is more necessary now then before to report such categories)
8. We think it should be done for all commodities as non-traditional are now active in all commodities
10. We think the data should be published weekly
11. It would not necessarily add too much an additional burden as they already have a reporting procedure in place.

Other comments:

We feed the COT report is essential to market transparency and stability and we would be disturbed if the publication of it was to terminate. We are also favorable to the creation of an additional category for non-traditional commercials as they are now the main force driving the market direction.

This email is in reference to your proposal to eliminate the COT reports. I say DON'T DO IT. This is one of the few things that government actually does that is good for the investing public. Without it the public is facing a stacked deck. Lack of information allows for market manipulation by a small number of large interests.

This will be another step in destroying public confidence in the financial markets. I can not understand why you would take a step in this direction.

Most important of all this is a freedom of information issue. Suppression of information is not healthy for a free and capitalist society. I have already contacted my congressional representative (James Duncan) and my senators (Bill Frist and Lamar Alexander) to investigate what you propose.

If anything, COT reports should be expanded to a *daily basis*, with a time delay of no more than 3 days.

Again, I implore you not to eliminate the reporting of the COT reports.

From: Alan Arnold [arnoldag@mchsi.com]

Sent: Saturday, July 22, 2006 1:03 PM

To: secretary

Subject: COT reports

For some time now, there has been a disturbing trend, that the political regime in power wants total information on all Americans, regardless of Constitutional limits. However, at the exact same time, they seek to hide, restrict, or simply cease providing information on any and all aspects of Government operations - in spite of the fact that we, as taxpayers and Citizens, ultimately both own and control the Government, regardless of the political complexion of the current occupants, in a Constitutional Republic.

The decision to omit reporting of M3, the broadest measure of the money supply, already had ominous implications with the current administration running up unprecedented and catastrophic debts, regardless of its supposed "conservative" label. Now, it is apparently proposed to cease publishing the weekly Commitments of Traders (COTs), a very important informational resource in day to day free market operations. This is another marker for the Ominous Trend: make it easier for the powers-that-be to game the system, while concealing their actions from an already befuddled citizenry. Such actions, for the immediate advantage of a few, only hasten the Day of Reckoning for all.

Instead of hiding information, more information should be provided, at more timely intervals, which can be done easily and cheaply in this era of the internet.

Sincerely,
Alan Arnold

Sirs:

By trade I am a teacher in the public school system. On occasion I read one or another of the websites of the financial persuasion, and, so, became aware of a proposal which would limit the quantity and quality of the information available to the public via the Commitment of Traders reports.

If there is substance to this allegation, I feel uneasy. Why would the CFTC choose to make such a change? If the United States supposedly fights totalitarianism globally, and one of the hallmarks of dictatorship is control over information, then one would think, we should assure the widest possible circulation of these data, along with education such that a wider portion of our citizens could avail themselves of the figures. If, in fact that the opposite is true, that your Commission seeks to close off this source, then is not such a change rather more anti-democratic? We are assured as to who suffers: the public. Who benefits?

I ask that your Commission preserve the status quo ante...a truly conservative position...that all may, to the limits of their abilities, benefit from this fount of data.

Thank you.

July 22, 2006

Dear Secretary:

The contemplated change in reporting is both unwarranted, unfair, and unwise. How are the numerous small to medium-sized traders supposed to remain even remotely comparable with the privileged "big guys", if easily available, timely information sources like the weekly COT are scrapped?

Nearly every modest-sized investor or trader I am aware of strongly opposes this proposed change.
Thank you for your attention.

Subject: COT Reports

Market efficiency relies on information. Perfect competition, the ideal, assumes perfect information. Removing the Commitment of Traders report would reduce information, which in turn would move the market further away from the efficiency of perfect competition and further toward the inefficiencies and inequities of asymmetric information. That is exactly opposite to what regulatory policy is for, unless the goal has changed from promoting public welfare to promoting insider interests. For these reasons, **I urge you to continue publishing the Commitment of Traders report.**

If the information in the COT reports reveals unwarranted concentration that can lead to market manipulation on either the long or short side, the solution is not to bury the data, but rather to take action against the manipulators. For example, my reading of the highly concentrated short position in the silver market is that it has been used to knock down silver prices, which has transferred a lot of money from my pockets to those of the manipulators. If the Commitment of Traders report helps identify the culprits, that is good not bad and appropriate regulatory action should be taken. If I am misinterpreting the Commitment of Traders reports in this regard, then the appropriate action is to clarify their meaning, not eliminate them.

Thank you for your request for input. Please let me know if I can be of further assistance.

Respectfully,
Dr. Robert Collinge,
economist

Subject: COT report

Hello,

I was recently informed the CFTC (Commodities Futures Trading Commission) has indicated that they may stop publishing the COT (Commitment of Traders) report, pending input from the public by August 20th.

Please consider the following:

The COT report is a vital tool for the free market trader. I use it everyday when considering trades. It is about the only piece of data the Government puts out that I actually think is useful. So when I found out this information might be taken away happen I was very disappointed, but unfortunately not surprised at all. I find the growing propensity of the US government to walk all over freedom of information appalling.

By hiding key market info like the COT report, the marketplace is no longer level, and free market integrity is deeply in question.

At a time when data is easy and cheap to gather we should have more data not less data. It seems the SEC, the CFTC, the FED, and various other government agencies are acting to restrict the flow of information. Many people are upset about the cancellation of M3 reporting and fear the same will happen to COT data.

COT reports come out on Friday reflective of positions as of Tuesday. In this electronic age, they probably should come out once a day or at least with a 1 day time lag vs. the current three day lag.

In summary, my input is that the COT report should be published MORE frequently and it certainly should not be eliminated.

Thank you for your time and consideration,

Sincerely,

Leland C. Wilkins

Dear CFTC Secretary:

It has come to my attention that the CFTC is considering the elimination of the Commitment of Traders Report (COT Report). I can think of no valid reason why this market information should not be made public. If anything, I would go one step further and suggest that the report delay be shortened (currently three days) to a one day lag AND release the report more frequently than just once a week.

We at Strategic Analysis find the COT Report highly useful in our market analysis and believe that its elimination would be detrimental to our business and our clients. I'm sure that many small investment counselors like us would feel the same way.

What we need in the public arena is more data and information, and it should be in a more timely, complete, and readable fashion.

Candidly, in this age of ease in gathering and organizing data with computerization the COT Report should be issued at least twice a week; or possibly a web site that provides daily committments at opening and closing with auto-computed changes and any of a variety of annotations. This is information and data that should be made available to EVERYONE, and no such information should ever be "fronted" to anyone for prerelease inspection.

Sent: Friday, July 21, 2006 2:26 AM
To: secretary
Subject: COT Report

RECEIVED
17 JUL 21 02:26
CFTC OF THE DISTRICT OF COLUMBIA

World economies and markets rely on stability which is made possible by a diverse investor and speculator group. Limiting market information will only increase volatility, increase the have and have not gap, crime and social demise.

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT reports

what are you people thinking, or better yet are you thinking!! then again maybe thats most of the problem, you seem to think you always know what's best for everyone else!!!! NEWS FLASH here people!!!! by what right, do you believe (in relation to your public fiduciary duty) that you should, either not have to report to the general public the COT...or at the very least water it down any further (by the timing of it's' release) the usefulness that it provides the "others, (ie. the small investors)" really, we are alot smarter than you people tend to give us credit for

lets see here if i've got this right !!! first you fudge 90% of the data you present us, second we deliberately get it sent out so late that it becomes less pertinent or almost useless, and to do what is proposed (stop reporting COT all together) certainly would seemingly only serve to be of benefit to a very narrow, select group of insiders.....and here i thought that was, at a minimum, less than honorable, lacking any vague relation to exhibiting any sort of integrity.

first it's the FED screwing us out of M3 reporting, and now, you have the gall to propose the further censorship of information. will you next take away all maps from the public too? (eg. former, [or so they're insisting] U.S.S.R. manipulators..... didn't your mothers and/or fathers teach you that it's one thing to be a character, and completely another to have character!!! i'm sure you'll soon be showing us your true colors.

just love what you've been doing with turning a blind eye to the paper shorts on silver for years....i don't want you to feel bad though, i already have very low expectations as related to your everyday performance of your fiduciary duties anyhow!!!

in closing, i am herein putting into writing, for the record, my personnal opposition to the proposed censorship of information by the ending of the public reporting of the COT.

thanking you in advance for taking your time and thoughtful consideration by reading these personnal comments about the proposal under discussion.

sincerely,

l. pitts

CONFIDENTIAL

To Whom It May Concern:

I was astonished to learn that the CFTC is considering the abandonment of the commitment of traders report. At a time when confidence in the financial markets and our free enterprise system has weakened, it would be an extraordinary lapse of judgment if these figures were no longer made available. They are of indispensable importance to the public's understanding of the commodities and financial futures markets. Rather than abandoning the reports, you should instead make them more up-to-date.

Yours sincerely,

David Hendrickson

Subject: COT report

I am concerned that our Government is not doing things for the right reasons – rather than encourage disclosure and open markets like it preaches to other countries, the Government is increasingly closing down sources of information – encouraged by a Republican administration that doesn't even allow dissenters to come to their political rallies (smacks of NAZI control). There is an eerie feeling that the Federal Government, guided by special interest business lobbies, is now more interested in maintaining control for the few, not allowing others into their little privately controlled process. In order for the public to continue to trust our Government, I feel that it should bend over backward to allow information to continue to be available – more available, not less. Please do not shut down the COT report. You're sending out the wrong message to the people you are supposed to support.

OFFICE OF THE SECRETARY

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

2006 JUL 21 AM 9:33

CFC OF THE SECRETARIAT

The American financial markets are exemplary of open competitive markets with transparent reporting systems and controls to ensure a "level playing field" for all market participants. The proposed discontinuation of the COT report is a threat to the fairness of this system, and clearly provides a competitive advantage to the hedge funds over the individual investor / trader. As an individual trader, I rely heavily on the COT report to assist me in making market decisions and am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books, and continues to serve as a valuable resource for individual traders.

In my opinion, the CFTC has a responsibility to provide quality information to all competitors in the market arena and not tilt the scales in favor of the larger participants.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less.

In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

I am not sure I understand where or how the public is served by elimination of this report. I am not a professional trader but I do read various analysts comments on where the market is going based on this information. If you stop making the information part of the public domain you have strengthened the position of one side of the trade at the expense of the other, and normally the position of the professional or commercial trader will benefit. I would urge you to hold hearings or go on CSPAN asking for public comment while explaining what the ramifications are. If the public does not respond then you can do what you like, but I think this needs to see the light of day before a decision is made.

Thanks

COT OF THE SECRETARIAT

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Dear CFTC:

I am totally opposed to the possible elimination of COT data being made public. The public needs the markets to be as open as possible. Already M3 numbers are no longer available. I do not understand why less data is being made public. How will that help anyone? The public needs to know how the "big boys" are acting to help curtail any manipulation of markets.

2006 JUL 21 AM 10:07

CFC, OF THE SECRETARIAT

To Whom it May Concern,

It has come to my attention that the CFTC is considering not reporting the Commitment of Traders (COT) report. I would like to take this opportunity to express my outrage at this latest move to reduce transparency and accountability in the markets. The COT report allows the public to see what is going on in the commodities markets and provides data which can be used to show market manipulation.

The publishing of the COT is one of the major pieces of evidence that analysts such as Ted Butler uses to show that there are concentrated short positions in the Silver market which are bringing the COMEX close to defaulting. If a rogue commercial bank were to generate lots of naked shorts it is possible for the bank to suppress the price of a commodity without ever having the possibility of covering those shorts...blatant price manipulation. Publishing the COT provides the necessary light to show the misdeeds of market manipulators.

In conclusion, I think that the COT is a key check to the power of large commercial players manipulating the market. I do not know the reason you have considered not reporting the COT numbers, but proposing that markets be less regulated and less transparent is not something a government regulatory commission like yourselves should be doing. As a taxpayer and US citizen I cannot support or understand your thinking on this and I ask you to reconsider.

Thank you for your time.

Stephen Nerlick

COT REPORTS

To Whom It Concerns:

The recent revelation of a possibility of the elimination of the COT reports has caused great consternation to me and my colleagues. In an era where computers have made the reporting of data both swift and convenient, it is inconceivable to me as to how the elimination of government data and reports could possibly be construed as a positive occurrence for the American public. If the public needs, and requires, anything it is more data, not less.

I would hope that the members of the CFTC would re-think their current position on eliminating the valuable COT reports.

Sincerely,

Michael Wright

We again face losing more useful information while the minions in Washington spew out government controlled data, propaganda, twisted data, and rip away our freedoms. Washington is not trusted by anyone any longer and yet we all face losing more and more of our freedoms to factual information while the loop and its cronies reap unearned and unlawful benefuts.

You bastards are no better than some of the same enemies we fight to preserve our freedoms. No politician or government employee has the least bit of respect from the public let alone any trust. You eliminate the M3 and now want to eliminate the COT Report. Let's all live in the dark so Washington can continue to twist and turn the truth and continue to build its power.

Remember, all great societies of the past crumbled from within and not from outside forces. You are making sure AMERICA will be added to the list.

Signed: A tax paying law abiding voter.

The COT report is a vital tool for the free market trader. I use it every day when considering trades. It is about the only data the government puts out that I actually think is useful. So when I found out this information might be taken away, I was very disappointed -- but, unfortunately, not surprised at all. I find the growing propensity of the U.S. government to walk all over freedom of information appalling. By hiding key market info like the COT report, the marketplace is no longer level and free market integrity is deeply in question.

Dear Mr. Secretary,

I am writing as an individual investor to express my dismay upon hearing that the CFTC is considering doing away with the weekly Commitment of Traders report.

To me, this is a big step backwards in market transparency. I would urge the Commission to take precisely the opposite action, and move to publishing this data daily.

For traders, investors, hedgers and researchers, this information is vital. The reputation of futures market, which has always suffered from suspicion of being gamed by the big players, could take a turn for the worse without this critical window into what said big players are doing.

Thank you for your consideration.

The CoT weekly report is one of the most useful pieces of information available for public traders like me.

In this electronic age, they probably should come out once a day with results posted for the previous day. This would be the most wonderful situation. The only thing better would be having the results posted live.

I greatly hope that you are considering more timely posting of the CoT reports. Some traders that I know are afraid that your solicitation of comments means that the government is considering terminating the CoT reports, and we all hope that this is not true. Termination would be devastating to our ability to trade effectively and would probably mean that a number of us would have to close our accounts, because there is so little useful information available to us. As a result we are at a great disadvantage relative to the large trading houses.

We really need the CoT--and the more timely the better.

Thank you.

Sincerely,
Kenneth Schmitt

2006 JUL 24 AM 10:13
OFC. OF THE SECRETARIAT

Sirs:

I must most strenuously object to the proposed cancellation of this report. I find the info useful as a small trader without a lot of information assets. I do not understand the reasoning for discontinuing the compilation and publishing of this report.

I contend that the more information available to the public, the greater confidence the public will have in the markets.

Again, I object to the discontinuance of the publication of this report.

Respectfully,

Larry Hull

Subject: COT Report

2006 JUL 24 AM 10:13

OFC. OF THE SECRETARIAT

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

2006 JUL 24 AM 10:12

OFC. OF THE SECRETARIAT

In the 30 or so years I have traded commodities and been a winner, the biggest help has been figuring out what the large professional and commercial traders are doing. This ability is the hallmark of the United States Markets. The COT report provided by the CFTC is what does this, gives the information about the positions of the large and small traders. It is essential information for us small and mainly republican traders.

I have also used the COT report to help me successfully time hedging and marketing of my crops from my farms. And I have helped other farmers do the same.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. 2006 JUL 24 AM 10:11

OFC. OF THE SECRETARIAT

If CFTC is even remotely concerned about serving the public interest, CFTC should INCREASE the frequency of publishing the COT reports (such as daily), and not use lame excuses to try to restrict market information. In today's electronic age, there is no reason why CFTC can't publish the COT on a real time basis. But I realize that won't happen -- after all, that would actually mean CFTC is actually seriously trying to be a regulatory watchdog and serve the public. Therefore my only hope at this stage is that CFTC stop monkeying w/ the precious few things that are actually useful -- such as publishing the weekly COT report. Is that too much to ask?

Excuses such as "too much paperwork," "lack of meaningful definition of 'hedger'/'commercial'/'speculators' are not credible coming out of CFTC's mouth. In fact, they sound like a blatant, bald-faced lie. They are as credible as the Fed, being a money-printing operation, saying that publishing the M3 report and its attendant data gathering is not cost effective.

What a joke.

Ms. Donovan,

I wish to comment on the COT Reports that are currently under review by your commission because I read recently that there is the possibility that the CFTC may no longer publish this data.

These reports have proven to be of utmost importance for those of us who trade the various commodity markets; therefore, it is imperative that the COT Reports continue to be published and released to the general public. I am a small trader and use the information provided in the reports to make some of my trading decisions. Also, several of the trading services I subscribe to use this information to inform their members.

So please continue to publish the COT Reports. Thank you!

Sincerely,

Dario A. Zgoznic

Sir or Ma'am,

The CFTC should definitely continue to publish the Commitment of Traders report on a weekly basis. Thank you.

To: secretary
Subject: The COT report gives the U.S markets - integrity,

Dear Sir/Madam

I'm greatly concerned that the COT report may be discontinued. One of the reasons why I exclusively trade US exchange markets from other exchanges from around the world, is due to the COT report. The historical data of the COT report is a great benefit to my studies as a trader, and this would greatly effect my ability in making economic and market decisions.

The U.S markets have market integrity compared to other exchanges from around the world by way of the COT report, and I fear this would be lost. Therefore I support the COT as a trader and the US exchange markets.

Subject: COT report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,

Richard VerMehren

Subject: COT Reports

Please continue to publish the COT reports!! It seems that occasionally, the government's idea of information is whatever they think is in "our" best interests. Maybe I am cynical, but after seeing our country's leaders adjust the inflation numbers by removing housing, energy & who knows what else, the number is meaningless. The same for M3, which they just stopped publishing. Why do you think that may be? Please don't let that happen to the COT reports. Leave them as they are, or make them available on a daily basis. In this age of computers, it seem that daily reporting would be reasonable. Thank you.

Subject: COT Reports

Dear Mr. Secretary,

I am writing to encourage the Commodities Future Trading Commission to continue its publication of the COT report. This report provides useful and necessary information to the public that cannot be sourced from any other group.

Kind regards,

Barbara Covell

Subject: Please continue publishing the COT Report

2006 JUL 24 AM 8:16

OFC. OF THE SECRETARIAT

Dear Sir

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Hello,

I use the COT report very frequently and it is a very special and well-performing tool for preparing market-related decisions. I'd be very disappointed if you are going to stop publishing the COT report. In a world of ever increasing data frequency and ever widening possibilities to monitor these information it would be a very questionable act...

Best regards,

Maik Enders

2006 JUL 24 AM 9:13

OFC. OF THE SECRETARIAT

I understand there is a movement afoot to abolish the COT reports by 'the people's government' along the same lines as the discontinuance of M3 reporting earlier this year. The reasons for this are apparently unknown but it seems to me that this would just tilt the field more in favor of the fat cats. As a (very) small time speculator in commodities options this will make it more difficult for those I rely on for trading guidance to supply me with good trading info. If said government (which continues to grow AND act like a cancer where the little guy is concerned) really wants to help Joe SixPack retain a decent standard of living, especially those of us on a fixed income, they should not only retain the COT reports but expand them and make them more timely. After all, gathering and dissemination of information is becoming more efficient and easy to do as time goes by. Thank you for your consideration.

Sirs:

I am writing in regards to the possible elimination of the COT reports. With out these reports, it will be increasingly difficult to successfully trade these markets. They will be subject to higher incidences of manipulation and fraud. If you truly are interested in fair and transparent markets, how can you allow this to happen ? If this transpires, it will further prove that you are controlled by large entities and that "government" is bought and paid for.

2006 JUL 24 AM 9:13

Mr. Secretary:

OFC. OF THE SECRETARIAT

I understand the Federal Trade Commission is considering elimination of publication of the Commitments Of Traders (COT) Report.

Commitments Of Traders report, which discloses the futures position of hedgers (commodity producers or buyers), big speculators (hedge and mutual funds), and small speculators (individual traders), and whether or not they are short or long and by how much they are short or long. That statement alone should be enough to tell you that certain players may not want their positions to be known.

Large market participants have access to this data anyway, and not just once a week, either.

Elimination of the Commitments Of Traders report eliminates a vital tool for the smaller market participant and may mask the activities of market manipulators from public view.

In this day and age of computer power, there should be virtually no cost to increasing the frequency of this report to a daily.

Please do not eliminate the Commitments of Traders report.

Greetings:

I will be brief.

I find the information in the COT Reports very useful in understanding what the Big Boys in the market are doing.

I would find them even more useful if you issued them DAILY.

In this Information Age of faster and more economical data processing, I do not understand why you would consider limiting your open reporting unless you were being unduly influenced by the "Big Players." ???

Please do NOT stop issuing the COT Reports.

Please begin issuing them DAILY.

Thank you for your kind consideration,

2006 JUL 24 AM 9:12

OFC. OF THE SECRETARIAT

Hi,

This email is to express my concern that apparently you have indicated that you plan to stop publishing the COT reports after August 2006.

The availability of market data such as the COT reports is critical for traders in determining the behaviour of the markets and selecting when and if to trade ... hiding this information by stopping the publication of the COT reports seems to serve no purpose other than to destroy the integrity of the free markets. Since the M3 reports are no longer published, this appears to be another step in a concerted effort by the government to prevent traders from having access to real market activity.

Please continue to publish the COT reports.

Regards,

Rob Davies

JUL 24 11 05 AM

CFTC OFFICE OF THE SECRETARY

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Dear Sirs,

I am a small commodity speculator. The COT reports are a valuable tool in determining what side of a trade I will take, if any. The information is invaluable. I would request that you make the information even more timely and update it twice a week rather than just once.

On another matter, I have heard that the new ETFs are being reported under the "Commercials". It would seem to me that a more appropriate classification for these funds would be "Large Spec".

Please continue to provide the public with the COT reports.

Sincerely,

Sam Jelovich

COT REPORTS SECRETARY

As a small investor, I would appreciate more COT reports. There is just too much information available to the big players. We small players already have a lack of or late presentation of pertinent data.

The only explanation for the removal of such helpful information is that it is either to benefit the "big boys" or there is a perceived necessity to keep the investment community in the dark.

CFTC,

As a trader I use the COT Report every week as it provides transparency to the US Futures markets, and provides me as a trader an excellent market analysis tool. I believe it is in the public interest to continue this report, which is evident by the number of people that visit the website on a regular basis. Because of this report the US Markets are steps ahead of other world markets, and this is why I trade your Futures Market. To see this report disappear would be a disaster

It would be great to even report on a daily basis. I realise it started out as a monthly report, then 2 weekly, and now weekly, but daily would be sensational. Don't cancel this report because of a few problems.....let's work through them and make the report better.

Regards

Subject: COT reports

Dear Sir/Madam:

I would like to go on record requesting that the CFTC publish COT data on a daily basis, or perhaps delayed by one day if necessary. Furthermore, the reporting should be enhanced by showing long/shorts by dealer as has been done on the TOCOM in the past.

Additionally, I would encourage the CFTC not to play any funny games with the COT data or reporting. With the illegal naked shorts issue, no reporting of M3, back-dated options, etc, the American markets are facing an integrity problem that will only get worse if honest people don't stand up and differentiate between what is right and what is wrong. I write this from my home in Asia and I know from discussions with traders from different countries that the practices prevalent in the American markets is well-known, particularly the manipulation issues.

Also, it would be nice to hear if someone would answer the questions delivered by Ted Butler to the CFTC regarding silver futures. In one way or another it would tell the global participants who trade commodities/options in the US where the Commission stands on these and related issues.

Thanks+regards,

Howard Campbell

Subject: COT report

With a market already a poorly rigged casino, the proposed elimination of the COT would be just another gross injustice to the general public that uses this report to help make trading decisions in the market.

With today's computers I would like to see this report come out every day not every week or month.

C. G. Gaur - 10/1/2006

Dear Secretary, CFTC

I ask the CFTC to not discontinue publishing the weekly COT report.

It contains very important for investors and traders.

In todays electronic information age, CFTC should be making more data available, not eliminating it.

I hereby request the CFTC to continue publishing the weekly COT Reports.

Thank You
Somesh Gaur

U.S. DEPARTMENT OF THE TREASURY
OFFICE OF THE SECRETARY

Dear Mr. Secretary,

I am concerned that you are considering reducing the frequency of the COT reports. As a small investor, I appreciate the timely release of any and all data that can help me make wise investment decisions. With modern technology, it is easy to collect and disseminate information. Please do not stop publishing the COT reports.

Thank you for considering this.

Regards,

-Jay Martel

Subject: COT Report

Dear Sir:

I assume that you will get inundated with mail about the possible termination of the COT Report.

The COT Report benefits the little guy in the world of trading; big money may use it but they don't need it.

It is usually useful and in some markets at some times it is valuable.

Two sites that deal with COT analysis (the ones I like best) are Software North:
www.softwarenorth.com/trading/commitmentscurrent
and Steve Brieze's (Bullish Review newsletter):
www.insidercapital.com/commodities.htm

I hope that you will continue to publish the numbers.

Sincerely,

Ed Rittershausen
small speculator

OFF. OF THE SECRETARIAT

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

COT. OF THE SECRETARIAT

I was recently made aware that you are planning to discontinue the weekly COT Reports. I strongly object to this action. In the information age we should be increasing the data made available to everyone so that we all have a level playing field instead of doing away with information so that only the government insiders can profit.

This administration's obsession with keeping vital information from the American public, i.e., the decision earlier to discontinue the M3 reporting, to cover up the fiscal mismanagement is scary. I am beginning to think I voted incorrectly in 2004.

CFC OF THE SECRETARIAT

Secretary Donovan,

The commodities markets have an increasing relevance to a broad cross-section of investors. More individual investors are affected by them than ever before, either as direct participants or indirectly via their funds exposures. All efforts to improve access to information are welcome!

The Commitment of Traders report is a very useful tool providing improved transparency of active important markets. Every investor, whether an active participant in the commodities markets or not, can derive valuable insight allowing better evaluation of overall market conditions. This is an extremely helpful publication of critical information. Any changes to the report or its publication should be focused on ways to make this data more available in a timely manner.

Improved technology provides the opportunity to level the investment playing field for all investors at less cost all the time. The current lag between compilation and publication of this data can be improved. Real time or daily updates should be the goal at this time. As the world's commodities markets become more accessible via electronic platforms open outcry trading, with its inherent reporting delays and costs, is reduced. The electronic platforms allow extremely responsive quotes, trades, fill reports and obviously create the opportunity to enhance general access to the critical data. The rapidly increasing volume trading metals electronically in Chicago versus open outcry New York indicates how important this is.

I look forward to more and better COT reports soon. Thank you for your efforts to improve service.

Sincerely,
Stuart M. Johnstone

secretary

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,
Vince Price

CFTC. OF THE SECRETARIAT

To the acting secretary of the CFTC:

I am writing to request that you continue to publish COT reports. I am a small-time, personal investor and I invest in commodities. I use the information provided to help decide on the trades I will make. This information provides a clear picture of what is going on in commodities and protects individuals like me against market manipulations. I am all for the CFTC continuing to provide this information to the public. We need this to preserve the free market atmosphere. Please continue to publish the COT reports.

Thank you,

Ben Kirchmeyer

To Whom it May Concern,

As an individual trader, I rely very much on the COT report to help me in making market decisions.

I am, therefore, deeply concerned that the CFTC is considering discontinuing such a popular and important service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the COT report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Without the historical reference, the report becomes almost useless.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission does see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool in my trading.

Thank you for keeping our markets transparent with full disclosure to the public.

To whom it may concern,

I'd like to know the reasoning behind giving the small investor less information than the large investor has. Regulation FD and other rules don't stop inside information from being disseminated amongst the large "players". The deck is stacked against us in almost every market. It is almost as if the powers that be are conspiring in finding more ways to separate us from our money. It's bad enough that there is a 3 day delay for this report.

First the M3 is eliminated and now this. What's next? Eliminate financial reports and quote services? Why don't we stop reporting CPI and PPI numbers and jobs reports? Why not eliminate crop estimates and cattle inventory? That way we would truly be in the dark.

My money market is looking better and better.

A concerned investor.

Please do not discontinue the COT reports primarily for the reason that I rely on this information for my investments to pay for my son's college education. Secondly, the elimination of M3 and now this certainly smacks of obfuscation of the reality of the markets. We have entirely too much government intervention into the free market, and the withholding of information is not what is demanded in a free republic.

Dear Sir,

It has come to my attention that the government is considering terminating the cot reports. I am very opposed to this idea. Rather you should be making the reports available in a more timely manner. This type of manipulation of the market data is one reason that many investors no longer trust the market or the government. Please rethink this idea.

Sincerely,

James Word

As an individual trader, I rely heavily on the COT report to assist me in making market decisions. I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books. While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible. PLEASE ALSO CORRECT THE HEDGER DATA Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers. I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world. Thank you for keeping our markets transparent with full disclosure to the public.

Dear Sir/Madam.

I am writing in support of the continuing publication of COT reports. As a retail investor, I am already at a tremendous disadvantage to institutions and other large shareholders. I use the COT reports regularly to inform my trading - I find them an invaluable piece of information that is available to the "little guy" to help us in our trading. Please keep publishing the COTS as they are crucial element of public data that helps even the playing field between the big guys and the little guys.

Thanks for your openness to input. And please keep the COT. In this age, we need all the help we can get.

Cheers,

Robin D'Arcy

OFFICE OF THE SECRETARIAT

Memo

Mr. Chairman,

It is with great alarm that I have learned the CFTC is considering discontinuing to provide the COT Report. As I small trader, the COT is the most important tool I use to make my trading decisions. I have also found it is, by far, the sole instrument a small trader has to level the trading "playing field". With out it, there would be no way for me (the little guy) to compete with the "BIG GUNS" in this Business. Therefore, my deep concern that the CFTC would even consider discontinuing such a popular and insightful service.

PLEASE KEEP PROVIDING THE COT REPORT!
Raymundo Rosa

Subject: COT Reports

Dear Sir:

Many small traders and fund and institutional traders depend on the weekly COT reports. Having to send you a comment concerning the possible elimination of this report is quite disturbing. There should be more timely release of market information rather than less. In this day of instant data gathering and dissemination the CFTC should already have changed the release of the COT report to at least 3 days a week and not just one as it presently does.

The Federal Government is becoming more intrusive in the lives of its citizens. And its becoming less willing to publish public information. This is a very disturbing trend which will most certainly have an affect on the coming Congressional elections. If you want to unleash a firestorm of criticism against the Republican Party and President Bush by eliminating the publication of the COT Report than just remember that government employee's are not beyond the reach of an angry electorate.

In case you haven't noticed the American people have already served noticed that they are very angry about how government has become such a giant problem. Somebody's going to pay. Politicians better wake up and so should those that work in government.

The American people are frightened about the prospect for the future and they are seething that rather than listen those in government are becoming even more high-handed and imperial towards them. This is such a time for listening. With both ears wide open...and a shut mouth.

Mr Secretary

My question is by illminating the publishing of COT reports, what are you trying to hide? First the M3 goes as the fed prints more and more dollars. Not publishing the M3 hides what is really going on at the presses. Now this with the COT reports. Again, what is trying to be hidden from the people of our great and free country? It seems almost daily we see our constitutional freedoms eroding in the name of patriotism and fighting terrorists. Now the government is going after the financial end of it too. Or is this just protecting big money traders at the expense of the little guy trying to make a buck or two?

This is just one little tidbit from what seems to be a massively larger picture. I do believe when the silent majority wakes up and sees what is going on, there is going to be "hell to pay" when Americans start ousting our elected representatives at election time in favor of more responsible and open candidates. Hopefully they will also rid the people of the bureaucrats that only seem to answer to big money.

Hello,

I have recently been informed that COT data may cease to be published after August. If you actually care about public opinion, let me clearly state: If you are one of those responsible for allowing paper shorts to fraudulently manipulate markets, and you remove COT data from public scrutiny to stifle critics of the crimes already underway, then I hope someday soon that you and many others are convicted and given harsh prison sentences.

If these crimes are not your fault, then my harsh response is not directed at you.

Choose your course of action wisely.

Dear Sirs,

The COT Reports are the indication by which many essential functions of our economy makes plans and meets citizens needs. The reports are important for farmers to determine which crops to plant, how much to spend on water, fertilizers and other care to balance yield with expense. The same with miners, and producers of other natural resources.

In fact the COT Reports are among the most valuable of all information, and abandoning the dissemination of this information would greatly reduce efficiency throughout major essential areas of our economy.

The COT Reports must be continued.

Sincerely,

Leonard Wohletz, CPA

I am opposed to reducing any information provided in the COT report and favor improved reporting. In this electronic age I find it odd that these data aren't reported daily instead of once a week with three days lag in the data. I also suggest that you name names and provide information on the position of individual commercials. These suggestions would only favor the market's role of finding price. Ignoring them would only favor rigging the game for a select group. Traders are sufficiently jaded already and suspect that your role in these matters is to carry out the latter. Why don't you surprise us for a change.

Subject: COT report

Free flow of information is an essential ingredient in free markets, and an essential ingredient in America's strength. As the costs to provide timely information decrease, I cannot understand why the CFTC would consider ending the publication of the COT.

This information has value to our markets, it has value to traders, and it has value to everyday investors who rely on traders to help establish orderly markets. The ripple effect cannot be dismissed in this instance, and I would urge the CFTC to continue the COT reports, and to provide the information on a more timely basis. Anything else would be a step in the wrong direction for our free markets.

Thank you for your time.

Stephen Finn

Hello Bennet.

Thank you for bringing this to our attention.

I think the idea of not publishing COT data is rather appalling. What is happening to transparency often touted by the authorities? Such ideas are leading the country in the wrong direction and are a threat to democracy. The powerful seem to always seeking more power over the populace which benefits the former and injures the latter.

I ask you to encourage this threat to be published on the internet via chat forums and other selected outlets.

I wish you success in your endeavors.

Regards
Robert de beer

Subject: "COT REPORTS"

Dear Sir,

As a citizen of the United Staes Of America, 20 year military veteran, two tours of duty in Viet Nam and extremely proud of MY country and its heritage - the land of the brave and the home of the FREE - I cannot for the life of me figure WHY the CFTC wants to now delay our/my access to TIMELY information of the "COT REPORTS". There can be absolutely "NO" good reason! CFTC should be desiring to put out this info to its citizens more often - Like twice a week or three times a week - NOT less often!!! The only thing I can figure is that CFTC has an "EVIL" agenda wanting to OBFUSCATE the "COT REPORTS". Is CFTC the FOX guarding the hen house? Are our governmental regulatory Agencies given over to complete and complicit corruption - in bed with the outrageously huge commercial shorts in gold and especially silver? I don't think we are much FREE - but we have become much CORRUPT. Publish the "COTS REPORT" more often - not less - don't be FOOLS. Sincerely, I am Richard T. Fishel

CFTC,

I would like to voice my feelings on the end of COT data. I use this data to make most every investment decision. To eliminate the best market predictor would again give the unfair advantage in the marketplace to the large funds. They can then manipulate the market as they see fit. The COT report was, in part, created to provide transparency. If we have learned anything in the recent past (Enron) transparency is what we find in freedom. By eliminating COT you are pulling the veil over the futures markets. More secrecy? Why? What is the reasoning for hiding the data?

I urge you to continue publishing the reports. They are a valuable tool for me and investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

CONFIDENTIAL

To whom it may concern,

I would like to voice my strong opinion as to the necessity for the continued and timely publication of the COT reports. These reports are instrumental in leveling the playing field between large institutional and commercial interests and the investing public. Such a leveling is an important hallmark of a transparent capitalist system such as ours. If there is a question as to the continued utility of these reports for the "public benefit" please rest assured that they provide irreplaceable utility with regard to a level playing field. Since I can't imagine that there is any serious question as to the desirability of a level playing field I can only hope that the logical course of action - retaining the COT reports - is recognized. The question, if any, should be why the COT reports aren't released with (considerably) less than a three day lag? In this day and age with its accelerating pace of abundant, ubiquitous and inexpensive information it would seem absurd that truly useful information such as these reports run counter-trend.

Thank you,

Subject: Commitment of Traders reports

Dear Sir or Madam:

First of all, it is interesting and a bit alarming that we do not have a titled Secretary to write to at the CFTC.

It is important to continue to publish the Commitment of Traders report when it comes to the gold and silver market. These reports help to keep the playing field level for small traders. Further, I would encourage use to publish the report on a daily basis, not once a week. This is an important report for all trades. This information is not expensive to gather and decimate and is the very foundation for the existence of your office.

As a side note I wish someone in your office would write to me and explain why the historic short position in silver is allowed to be maintained by so few trading entities. What is going on? Deciding not to publish the COT is not a good solution to this problem. Transparency is an overworked word, but by God, I hope you use your office to make things transparent on the up and up in our commodities markets. Things feel very wrong in the precious metals right now, particularly silver. If there is monkey business in this market, I hope you are able to take care of it before there is Hell to pay.

Subject: COT REPORTS

THIS IS THE FUTURE. Information should be MORE available , not less.

1. What types of traders in the futures and option markets use the COT reports in their current form, and how are they using the COT data?

More specifically:

- (a) How do traders use the COT information on commercial positions?
- (b) How do they use the COT information on non-commercial positions?
- (c) In particular, with respect to information on non-commercial positions, what information or insights do traders gain from the COT reports regarding the possible impact of futures trading on the underlying cash market?

PLEASE, the difference in the positions is clear as day , Commercials tend to be more aware of the underlying strength or weakness in the market and act accordingly. This is the only place to see where people are voting with their dollars instead of their mouths.....

2. Are other individuals or entities (academic researchers or others) using the COT reports and, if so, how?

Yes - any number of us are checking COT data to double check general market conditions.

3. Do the COT reports, in their current form, provide any particular segment of traders with an unfair advantage? NO, it merely shows where people are placing their dollars - and it does it for everyone, not just the insiders.

4. Should the Commission continue to publish the COT reports?
ABSOLUTELY !!!!

5. If the Commission continues to publish the COT reports, should the reports be revised to include additional categories of data--for example, non-traditional commercial positions, such as those held by swap dealers?

IF revised, the current traditional numbers should also be kept up. any new information should be added, not exchanged for the old data.

6. As a general matter, would creating a separate category in the COT report for "non-traditional commercials" potentially put swap dealers or other non-traditional commercials at a competitive disadvantage (since other market participants would generally know that their positions are usually long, are concentrated in a single futures month, and are typically rolled to a deferred month on a specific schedule before the spot month)?

NO. Just look at open interest. You know the rest.

7. More specifically, if the data in the COT reports are made subject to further, and finer, distinctions, such as adding a category for non-traditional commercials:

(a) Would it increase the likelihood that persons reading the reports would be able to deduce the identity of the position holders, or other proprietary information, from the reports? doubtful.

(b) Could such persons use information gleaned from the reports to gain a trading advantage over the reported position holders?

(c) In such case, in order to reduce the likelihood of publishing categories with few traders, which might provide information giving other traders a competitive advantage over the reported traders, should the Commission consider raising the threshold number of reportable traders needed to publish data for a market from 20 traders to some larger number of traders?

even 20 should be enough

8. If the data in the COT reports are made subject to further, and finer, distinctions, should the reports be revised for all commodities, or only for those physical commodity markets in which non-traditional commercials participate?

9. If a non-traditional commercial category were added to markets in physical commodities, what should be done with financial commodities, where "non-traditional commercials" would be essentially an empty category (since, in financial commodities, swap dealers would fall within the pre-existing "commercial" category)?
continue with the current reports - only more timely.

10. The Commission has observed that the non-traditional commercials tend to be long only and tend not to shift their futures positions dramatically--even in the face of substantial price movements. If the data in the COT reports are made subject to further, and finer, distinctions, would issuing the additional data on a periodic basis, in the form of a quarterly or monthly supplement, be sufficient?

11. Some reportable traders engage in both traditional (physical) and non-traditional (financial) commercial activity in the same commodity market. If the data in the COT reports are made subject to further, and finer, distinctions, such traders would have to break out their non-traditional commercial OTC hedging activity into a separate account. Would such a requirement represent an undue burden to those traders?
As long as you keep the report and requirement simple, How much extra effort is a total, and a segment. let the computers figure out the rest.

In response to your request for comments, I am deeply concerned that the CFTC would consider discontinuing such a popular and insightful report. While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. Certainly true hedgers should have their own category. In general, any modification must avoid discontinuing, suspending, or delaying the Commitments reporting. And the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Finally, I would request that if the Commission should decide to make changes that could negatively affect the continuation, continuity, or promptness of the COT report, that it submit such proposed changes for further specific public comment.

Subject: Cot Report is a vital resource

Dear Commisioners:

Please consider the fact that the COT report is a vital instrument for individuals and fund managers when assessing the market. The fact that today with the cost of communicating and tabulating information is so greatly reduced through more advanced technology it would seem you should be considering expanding the frequency and scope of this type of reporting rather than curtailing it. In a time of massive backdating of options and massive insider trading offenses more transparency is warranted rather than less.

Furthermore the removal of this reporting will serve to favor the largest constituencies against the individual and smaller trading firms. This is unfortunately in keeping with other examples this government and this administration demonstrated favoring the extreme wealthiest sector.

Please consider adding more frequent reporting rather than less.

Sincerely

Eric Egas

The elimination of the COT report is one more step into the dark ages unless it's going to be replaced with something more viable and informative which I doubt. Transparent mkts are what all oversight agencies are supposed to strive for. The elimination of this data gravely reverses that effort. Indeed, with the electronic reporting now available, this information should be published with a lag time of only one day, not three. But eliminate? Outrageous.

2006 JUL 24 11:17:47

OFFICE OF THE SECRETARY

Dear Secretary,

I believe the COT Report is a vital tool for the free market trader. It is a very useful data for individual traders like myself. By discontinuing key market information like the COT Report, the marketplace is no longer level and the integrity of the free market is deeply in question. I am sure that certain players may not want their positions known. But I am confident that the big players (institutions) will probably know it anyway and not just once a week. At a time when data is easy and cheap to gather, we should have more, not less data. Many of us are upset about the cancellation of M3 reporting and fear the same will happen to COT data. In this electronic age, COT Reports probably come out once a day, or at least with a one-day time lag. The same holds true even more for short reports. As an individual investor I feel more and more that the deck is being stacked against us. In this day and age the investment market seems to be full of scandals and it is often because of the lack of timely information to everyone. The government needs to try to keep the playing field level for everyone, not just big institutions and big business. The middle class is what made this country the great nation it is. The elimination of the middle class will make the US just another third rate nation. Those of us who are investors and enjoy the challenges of the investment market need this information. Thank you for the opportunity to comment on this vital report.

OFFICE OF THE SECRETARIAT

Dear Secretary Donovan:

I was distressed to learn from the Federal Register Online, that elimination of your weekly "Commitment of Traders" reports is even a question for consideration:

4. Should the
Commission continue to publish the COT reports?

The COT reports are an extremely useful tool for small investors to be informed about what the "big boys" are trading in the options field and **should be expanded in content and timeliness - not reduced!**

Thank you,

John P. Lockwood

OFFICE OF THE SECRETARIAT

I strongly oppose the elimination or reduction in data provided by the CFTC in the weekly COT report. I feel this is a move away from transparency, and is frankly designed to hide market manipulation by large trading entities, Federal Reserve Bank Member firms, currently given great leeway by the CFTC to manipulate certain key strategic commodities. Indeed we know from the Federal Reserve Banks own notes and memos they have authorized Goldman Sachs to intervene in the natural gas markets and in the currency markets. Sadly the CFTC has become a partisan, largely republican dominated organization, supported by our tax dollars and CFTC management has enjoyed for too long a revolving door relationship with investment banks, to the neglect and indeed, general abuse of the trading public. The CFTC needs to greatly INCREASE transparency in the markets like the Japanese Tocom with the COT and NOT eliminate it.

I'm very disheartened the CFTC would even suggest this. IMO, the govt through market manipulation is trying to effect a two tier pricing structure, the real street price of a commodity, if you were actually to try and purchase it like it costs much more to purchase an oz of gold than what it trades for on the COMEX, and the 'paper' price. Im going to write to my elected representative, or the one that Goldman, Citi, elected through Corporate campaign contributions. The CFTC hasnt done its job in YEARS, and the silver and cattles futures market are proof of it. Shame on YOU all at the CFTC, your the biggest joke as a govt agency after the SEC. You exist to abuse small traders and protect the investment banks, and we all know the Federal Reserve Bank is behind most of this manipulation as well their own notes say they are authorizing intervention in the commercial markets. If the govt is going to intervene, and 'run' or control the prices then traders need to know what they are up against as futures trading is a zero sum game. Its supposed to be about price discovery in a free market. Now tell me all those cattles futures shorts at Tyson have cattle to deliver or all the commercial silver shorts have silver to deliver. You know and I know that is a LIE.

Clean up your act, CFTC, we are tired of paying your salaries for abuse of the general trading public so you all can work at Goldman or JPM-Chase when you leave the CFTC, as 'thanks' for a job well done fleecing the trading public.

Sincerely,

John

Subject: COT report

Please do not eliminate the weekly COT report. If anything, in todays technologically advanced environment, the COT report should be more timely (daily not weekly).

The elimination of this report would be a gross suppression of public information.

This along with the termination of M-3 reporting, would smack of governmental interference in the free markets and restrict the sharing of public information as covered by the Freedom of Information act. If it weren't for the COT reports, we small investors would not be able to see the blatant manipulation apparent in the silver and gold markets. (Perhaps this is what the possible illumination of the COT reports is really all about).

Thank you for you prompt attention to this matter.

Respectfully

William R Halligan

OFC. OF THE SECRETARIAT

Subject: COT reports

I'm writing to urge that COT data continue to be published and that the frequency of reporting it be INCREASED. At a minimum, the data should be published on a more timely basis. The current delay of 3 days can be and ought to be improved. The possible elimination of this information clearly would be harmful to the the individual investor and would only benefit large, special interests that already have an unfair advantage over small investors. We may not have the clout that all the money and paid lobbyists bring to the investment bankers and hedge funds, but we should not be deprived of the vital information available to them because of that disadvantage.

Subject: COT reports

Aloha:

I am one thousand percent against the elimination of the COT reports or any adjustments to increase time lags. I feel that this report should continue to be made available to traders of all levels. I feel strongly that the frequency of these reports should be increased to insure that the data is timely and useful to those that read these reports on a regular basis.

I have no idea why anyone in their right mind would want to decrease the frequency of these reports or possibly eliminate them altogether. The only thought that comes to mind is that government and market controllers are trying to carry on their trades in the smoke filled back rooms among the "good old boys". In this way they can stack the market in their favor. Keep it honest and we all win.

STOP THIS INSANITY NOW!

Subject: COT Report

OFC. OF THE SECRETARIAT

Please do not eliminate the Commitment of Traders report. I believe that we desperately need more information not less in all of our markets. I applaud the SEC for cracking down on back dating of stock options. If anything, the COT report should be made more frequent and with a shorter delay.

If there are systemic problems, better to get them out in the open and resolved. Anything that hides the problems and allows insiders to cover themselves at the expense of the public will ultimately backfire. We are all in this together, even people sitting on a pile of money. Their gated communities and fat bank accounts will mean nothing if the system comes crashing down.

Thanks,
Vincent Bressler

To it may concern

My name is Robert McGuire and I have read that Cot Reports were going to be no more. I think that would be a mistake for these reports do really help investors out in the investing world.

I think the report could be even improved to help investors out even more by correcting the hedgers data, but even without doing anything to the report it is still to valuable to just stop releasing it.

Thank You

Robert McGuire

Subject: COT Reports

Dear Sir,

It occurs to me that you may well choose to disregard this input since I am not a US citizen or resident. If you're still reading however I would like to make the following point as a long time investor in the US. This move to cease publication of the COT report provides a strong indication to the rest of the world that the US is moving towards less transparency rather than more. I would strongly suggest that this is not the right message to be broadcasting at time when the medium term value of holding US investments is being questioned by many foreigners.

Yours sincerely

Hugh McGarry

CFTC OFFICE OF SECRETARY

To: secretary**Subject:** COT reports

In response to your request for comments, I am deeply concerned that the CFTC would consider discontinuing such a popular and insightful report. While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. Certainly true hedgers should have their own category. In general, any modification must avoid discontinuing, suspending, or delaying the Commitments reporting. And the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Finally, I would request that if the Commission should decide to make changes that could negatively affect the continuation, continuity, or promptness of the COT report, that it submit such proposed changes for further specific public comment.

Dear CFTC:

It has come to our attention that your agency is considering an action which would either cancel or delay reporting of the Commitment of Traders reports. You have requested comments from the public on this matter.

In our view, it is highly counterproductive to initiate any such changes in the current reporting rules. In fact, we believe the COT figures should be made public the same day the data has been collected, not reducing the availability of information. It is critical that your agency not eliminate or reduce this valuable source of market barometer, as it helps investors to moderate the risks they assume by exposure to the various markets.

Again, PLEASE CONTINUE THE COT REPORTS AS CURRENTLY IMPLEMENTED and if any change is to be made, then please REDUCE or preferably ELIMINATE the delay in reporting such data.

Thank you,

M3 and now COT report? And you kooks claim we have transparent markets?
For whom? The wall street banking crowd?

You guys are too obvious. Go ahead and quit publishing the report.
Everyone has figured out the markets are rigged to benefit the banksters.

You guys are disgusting, Shame on you!

Subject: COT Report

Dar Mr Secretary-

I am writing to you as a concerned investor in commodities and a concerned US citizen who is appalled at the trend towards "non-disclosure" and diminishing disclosure of information by our current government- namely you and your office.

Specifically it was a low blow to open/free markets that the govt decided to discontinue M3 reporting in March.

And now you want to either diminish or discontinue the reporting of:

COT Commitment of Traders reports
for commodities futures.

Instead of diminishing or even eliminating our flow of info concerning COT, you should be increasing it to at least twice a week or even daily.

There is enough collusion and insider trading that goes on between powerful parties and govt. The little guy is getting less of a chance every day in this so-called "free-enterprise" society.

Do not diminish or discontinue the COT reports.

Thank you
Paul Ronning

Subject: COT Report

Dear Ms Donovan

I received the news yesterday that the COT report may be discontinued pending public input. Therefore I decided to write to you and to hopefully urge you not to discontinue this valuable report. I've designed this email as a more personal message to you, in order to portray how extremely important the COT report is to me.

I began studying the US commodities markets 3 years ago, and was attracted to the markets on hearing about the information contained within the COT report. I spent the 3 years up to today studying intensely the information within the report, as well as learning about the power of the COT report when applying it to market data (with the use of technical analysis software from Genesis Financial Data Systems). In two months time, I was planning to begin trading with real money. I plan to make trading a full time career. Then the news flash appeared! (Just my luck! lol!)

If the COT report were discontinued, I believe those 3 years of my life were a complete waste.

I'm sure there are thousands of people who rely on the report just like me. Please, please, please, please, please do not discontinue the report. If I could get on a plane tomorrow & get over to the CFTC headquarters (I'm based in the UK), I'd be on my hands & knees begging!

I'm hoping this message will appeal to the more personal side, rather than the commercial side, of you & the CFTC respectively.

Best Regards

Subject: COT report

Dear Sir/Madam,

I have noted with some considerable concern, that the CFTC is considering the withdrawal of publishing the weekly Commitment of Traders reports. I am not sure why the CFTC would be considering this action, but perhaps you might reply to this note with an explanation. The withdrawal of this report would seem to be a regressive step in terms of maintaining an open and free market, that is not subject to manipulation. Indeed, it seems to me to be a metric that a market regulator would be proud to publish, as it would demonstrate over time that the markets for which they have oversight are being prudently and fairly managed.

Yours with concern,

Keith Gilligan

COT. OF THE SECRETARIAT

To Eileen Donovan,
Acting Secretary, Commodity Futures Trading Commission,
Three Lafayette Center, 1155 21st Street, NW.,
Washington, DC 20581.

Madam Secretary,

The COT report is a vital tool for the free market trader. I, and my associates, use it almost every day when considering trades. It is about the only data the government puts out that I actually think is useful. So when I found out this information might be taken away, I get very disappointed.

By hiding key market info like the COT report, the marketplace is no longer level and free market integrity is deeply in question.

At a time when data are easy and relatively cheap to gather, we should have more, not less, data.

COT reports come out on Friday and are reflective of positions as of Tuesday. In this electronic age, they probably should come out once a day, or at least with a one-day time lag.

Please continue producing the COT Report on a weekly basis.

Regards,

David Lee

JUL 21 2006 11:05 AM
OFFICE OF THE SECRETARY

Sir:

I strenuously object to suppression of information as exemplified by a squelching of M3 reporting and the contemplated elimination or decreased frequency of COT reporting.

There is no JUSTIFIABLE reason(s) for the suppression of economic data and the ironic fact of the matter is that the ultimate unforeseen consequences of such actions will be opposite to the intended goals of their perpetrators. Such actions will add further injury to the free market system of entrepreneurial capitalism that was one of the main pillars of the Republic of the United States epic and rapid rise to world preeminence. These interventionist stakes being driven into the Constitutional heart of the Republic by the greedy, by the ignorant of the core basis of our once most prosperous of all societies in the history of the world, need urgently to be removed.

Read and study those brief documents, dear sir, i.e., the Declaration of Independence and The Constitution of The United States of America. They are unprecedented in the history of the world. Their neglect by these past three generations has led us down the ruinous path of socialism and big government. Freedom, Liberty and Self Determination make a people great. You are on the wrong side of this, sir, if you act to suppress rather than support Freedom, Liberty and Self Determination. Wake up, sir. Our Republic is in extremis. We are in desperate need of resuscitators not coffin nailers.

Most respectfully yours,

Peter Gasperini

Gentlemen,

First the elimination of the M3 money supply reports and now the proposed elimination of the COT reports. It is obvious that the government is in a conscious effort to curb information to the small investor like me who uses the reports in his investing activities. I do not approve of the government interfering in the market in any manner, and will vote for those individuals who will reverse the recent trend towards manipulation of the markets.

It is little wonder why corporations like Enron, Mirant, World Com and a host of others rob and steal from the public when our government sets such low standards for credibility, honesty, and fair play.

I urge you to reconsider your proposal for eliminating the COT report.

Sent: Friday, July 21, 2006 11:54 AM
To: secretary
Subject: COT reports

Dear CFTC,

Regarding any changes to reporting the commitment of traders, currently done weekly on Friday with three-day delay, I would like to suggest that the commodity markets as a whole, and indeed our entire society, would be best served by more transparency regarding information on trading positions, not less. Therefore I would propose that any changes to the COT reports result in more frequent reporting with a shorter time lag - in the current age of electronic data, reporting the COT twice weekly with a one day lag does not seem overly burdensome. Given our modern fast-moving markets, I cannot conceive of this having an unduly adverse affect on the parties holding the positions, and it would likely result in much enhanced stability and confidence in the commodity futures markets. Part of the price of confidence in our markets, like liberty, is constant vigilance. Thank you for your consideration of my comments, David V. Long

Let me register my opposition to any effort to limit the COT reporting period or to eliminate this data from the public informational stream.

The government data on COT statistics is vital to those of us making our own investment decisions; especially in light of the movement to self-directed 401k accounts and the elimination, to a large degree, of defined plans for retirement.

Since M3 data is no longer available and other data is unreliable, (i.e., inflation statistics, price data), elimination or curtailment of COT data would be detrimental to many people who manage their money.

Thank you for your consideration in this matter, and I trust you will not ignore taxpaying Americans as we try to invest intelligently and efficiently.

Please don't stop publishing the COT report. It is vital to our free trade society. We need the information on a daily basis.

To stop publishing is depriving us of vital information.

I'm concerned that our gov't is creating a playing field that favors the largest corporations and traders and putting the small investor at great risk.

Subject: COT report

Dear Secretary of the CFTC:

The CFTC (Commodities Futures Trading Commission) has stated it is considering elimination of the COT (Commitment of Traders) report, pending input from the public by August 20th. In response to your solicitation for public input as to this proposed change, herein, please find my comments regarding this issue.

The stated mission of the Commodity Futures Trading Commission (CFTC) is to protect market users and the public from fraud, manipulation, and abusive practices related to the sale of commodity and financial futures and options, and to foster open, competitive, and financially sound futures and option markets.

As a market participant, I find the COT report provides a useful source of information regarding market participation and a degree of transparency that enhances open and competitive markets. Removal of this report, or any move to further limit transparency as to market participation, would defeat the mission of the CFTC to protect the interests of ALL market users and reduce market competitiveness.

Since the CFTC is funded through individual and corporate tax revenue, the intent of this organization should be more inclined to increase market transparency rather than remove data that would limit competitiveness. Congress has entrusted the CFTC to provide market oversight for the public against fraud, manipulation, and abusive practices related to the sale of commodity and financial futures and options. If the intent of the CFTC is to reduce internal costs through removal of activities associated with the compilation of data and publishing of the COT report, then

The CFTC is certainly focused on these market oversight activities. However, even with the current less than fully transparent COT report, on occasion the public may have opportunity to identify activity that falls under CFTC regulation, but was not initially noticed during normal regulatory scrutiny. Essentially, with the COT report, the public has an opportunity to serve as a backup or additional set of eyes to assist the CFTC in performance of its mission. Therefore, discontinuing the COT report would also eliminate a valuable support mechanism to achieve its mandate.

Sincerely,

W. H. Black, Jr.

CC: Senator Elizabeth Dole, (R-NC)
Senator Richard Burr, (R-NC)

Subject: COT Reports

I am a farmer. Please keep publishing COT Reports. Keep Commercial and Non-commercial categories. Break out Index Funds and Hedge Funds as separate categories. The COT report should be available at the close of each trading day. The current system of reporting Tuesday positions on Friday after the markets close with 2 non-trading days approaching is worthless. The insiders on the exchanges know positions instantaneously. This is a clear disadvantage to a farmer. By the time you report the Commercials position on Friday it could have already changed. That's why the COT should be available each day at the close of trading. Big traders say this may divulge their position. Well, they know farmers and grain elevators positions. It's about time we knew their's. Anyone who does not produce (farmer) or handle the actual physical commodity (elevator, end user(food company, bakery), exporter) is a speculator and probably should be banned, but then we would not have liquidity.

In summary, please keep issuing the COT Reports. Break out funds separate. Issue the report each day at the close of trading or at 7:30 AM Central before the start of trading.

Thank you!

Dear Sir,
 e held accountab;

You must give us more information and do so in a timely fashion not less of it. It is your job protect the general public, not a handful of people who because of their wealth or power will have access to info that the rest of us will be deprived of. You Must Not Do That, PLEASE DO NOT FORGET THAT YOU ARE A PUBLIC SERVANT. You work for me and all the other citizens of this country not for a small interest group. You must serve the public interest. You must always ask, "Qui Bono?" - who benefits. If the answer is not "most of the people," you'd better have an extremely insightful, logical defence for your actions. You will be held accountable - trust me. A properly functioning market place where all of the citizens have access to the same information is the economic concomitant of a democratic political system. You look to all others like a fool and/or a greedy, gluttonous pig when you espouse the principles of democracy to the whole world then act like a totalitarian despot in the economy. No one is so dumb as to not see it. Don't kid yourself. Everyone can and does see what you are doing. Don't do anything you ought to be ashamed to tell your children about. You will never understand when they turn out to be dopers or worse who loathe you. You can not escape the cost of your behavior. Please do your job and give us more not ;ess info and give lot to us every day when it is n most useful.

sincerely,

jeff young

OFFICE OF THE SECRETARY

Commodities Futures Trading Commission,

The publishing of the Commitment of Traders (COT) plays a big role in my trading decisions and I've learned you will be instrumental in having the publication stopped.

I have a serious concern the CFTC believes censorship is the right thing to do, it's not. I can't even imagine someone wanting to stop a well used source of information like the COT.

With any sources of information, we as investors need the (COT) report for support and investment ideas.

General released to the public has changed the playing field over the years and has given the individual investor a fighting chance to "WIN" on a level playing field.

Just don't forget by squashing the little man out of the equation, you continue to suppress the right to know, and freedom of the press.

Don't throw us back 75 years, keep the COT alive and well, the investment world and the people have taken enough beatings.

2006 JUL 21 PM 1:21

2006 JUL 21 PM 1:21

Up until today I did not know this report even existed, but people I trust seem to think it is a vital component in knowing what is going on in the marketplace. These people, in turn, give me investment advice which, in part, is based on info in the COT report which now comes out weekly.

So any attempt to reduce the frequency of such reporting must be viewed as yet another move to limit information which SHOULD by rights be available for the use of EVERY investor.

I urge you to NOT reduce the frequency of the COT reporting, as private investors need every bit of info we can get to have any hope of making money in today's markets. I realize that there may be budgetary constraints or other problems which lead you to believe that such an action would be beneficial to you or your superiors. Let me assure you that such is NOT the case.

People are already up in arms about the elimination of the M3 report. This would be just one more indication to me that the government exists to serve people with BIG MONEY and not us rank and filers down here in the bunkers. Why? Because the ones with big money will already KNOW such info, and probably a whole lot faster than any weekly report you can issue. THEY can afford to PAY for it. I can't- and wouldn't know what to do with it if I had it.

So you just go right ahead and stop doing your job if you want to. See where it gets you.

Me? I am just watching my money go down the drain. Along with the rest of the market.

Cheers,

Frank

P.S Just in case you don't understand plain English. KEEP THE COT REPORT coming out on a weekly basis!!!!

OFF. OF THE COMPTROLLER

Dear folks:

I received an E-mail this morning that tells me...

"The Commodities Futures Trading Commission has indicated that it may stop publishing the COT (Commitment of Traders) report, pending input from the public by Aug. 21. Pepe wrote on this a while back, and I use, and have used, these data with great success over the years. In fact, I usually buzz each Monday, and it played a HUGE role in my being out of stocks during the bear of 2000-2002.

They have already gotten rid of M3, one of the other most important data that we use as traders and investors (both individual and institutional).

Do I still live in America? Why must we be kept in the dark? So they can make a bigger mess without us knowing, I suspect -- I hate being that cynical, but it sure feels that way. Maybe they should take my Bloomberg away, and my Treasury quotes, turn off the lights, and have me GUESS what to pay?"

I don't know what others are giving you for feedback on this idiotic idea, but personally, I want you to leave this report alone!

Are you guys serious! Do not stop Publishing this report! Why would you want to do this?

I have been wondering for quite a while if performing your function as a "watch dog agency", is more about protecting the interests of big money and government than it is about protecting anyone else. They do seem to own you like big Pharma owns the FDA.

I am not confused at all. At a minimum, this proposal indicates to me you sure as hell are not looking out for my interests as a small guy trader who uses this information daily. In fact, I am going to copy my representative - Doc Hastings - on this to see if he support this kind of obvious BS. You may hear from him.

Really folks!..... have any of the people making these proposals in your agency ever traded commodities at all?! What are you guys - Idiots?

I am a voting US citizen/taxpayer and am asking that the COT report not be eliminated. You do little enough as it is for the tax paying public that funds your operation to police the futures markets (that I think are manipulated and stacked against the individual traders and investors.) Eliminating the COT report will allow even more rampant "naked shorting" of futures markets by large corporations and trading houses (remeber, they don't pay your salary, the US Taxpayer does!) When the futures markets are dominated by a select group of sellers that have radically oversold the market with contracts far exceeding the existing supply, this information should be made public. I am watching the outcome of this decision and will remember anyone that was associated with the elimination of the COT in future years. Thanks for your consideration, Eric Brandt

Subject: COT Report Comments

In a day where the small investor seldom is able to play in the market on a level field, the loss of information contained in the COT reports would clearly make it a greater risk for me.

If any change is to be made to this COT report, it should be improved real-time information. (a lag of one day or so). Information from the government about what is going on is crucial. Wholesale investors can get this information, but retail investors like myself rely on the COT report to manage our risk. In the "information age", it is very alarming that the government is considering sharing "less" rather than "more" information. Information about and from our government is a clear measure of liberty and liberty is worth protecting if you want individuals to invest in the commercial market. I urge you to continue the COT report and consider reporting this information as close to real-time as possible.

Subject: COT report

I understand that the CFTC has indicated that they may stop publishing the COT (Commitment of Traders) report, pending input from the public by August 20th. I'd like to take this opportunity to provide my input. I think the COT report is an invaluable tool for traders and investors and should not be discontinued by the CFTC. I use the report, so do many traders that I know and know of.

This news has made many in the investment and trading community very nervous, particularly since the Federal Reserve suddenly stopped publishing the M3 money supply numbers. I think that the CFTC should consider the usefulness of the COT report and the apparent effort by our government in general to reduce transparency as two good reasons to continue publishing the it. We in the financial industry rely on information...and the COT report is perhaps one of the most useful sources available.

Thank you,

Tyler Phillis

COT OF THE SECRETARIAT

Dear CFTC;

I was shocked to hear you are considering getting rid of the COT reports.

These reports should be available more often, not removed from the general public. You are messing with the free market system, isn't it bad enough they took away the M3 reports! Why, manipulation by the government.

It must stop here, you must overdisclose not under disclose!!!!

Concerned Trader,

W Isaksen

Subject: COT report

Dear Mr. Secretary,

I support the continuation of the COT reports for transparency and integrity of the markets. It is my belief that America needs to be confident that over-manipulation of the markets isn't the rule – as in the silver market where a few entities continually control the majority of the short positions.

I strongly believe this: Prov, 20:10 Divers weights, and divers measures, both of them are alike abomination to the LORD.

Please keep the markets honest and transparent.

From: Robert TORRINGTON [rtorrington@rogers.com]
Sent: Sunday, July 23, 2006 8:44 PM
To: secretary
Subject: COT reports

As a small investor I feel the COT reports give me a fighting chance in the markets. I know of no other way to see how the big guys are using the market . The COT report is my last factor in the decision making process. All it takes is to look at the data and one can see if the small investor is being used by the large ones. Please don't remove this valuable tool.

Admittedly the following is a form letter email from the people I pay to gather the reports for me. You have probably seen it before, but I do think it is correct .

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report,

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission

would seem to demand more transparency, not less. The Enron fiasco demonstrated the need for increased

transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

The COT report information cut-off is a Tuesday, but is released on Friday. It would be more useful if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

As an additional response to your request for comments, I would again like to say that I am deeply concerned that the CFTC would consider discontinuing such a popular and insightful report. While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. Certainly true hedgers should have their own category. In general, any modification must avoid discontinuing, suspending, or delaying the Commitments reporting. And the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Finally, I would request that if the Commission should decide to make changes that could negatively affect the continuation, continuity, or promptness of the COT report, that it submit such proposed changes for further specific public comment.

Subject: Terminating the COT Reports

Sir:

The WHOLE POINT of the COT report is to level the playing field enough to give the small trader a fighting chance to profit in commodity trading. If you eliminate this service, the big fish, with their inside information, will have an absurd advantage over the rest of us.

What were you thinking? It's un-American.

After seeing M3 reporting eliminated, and now this, I can only conclude that America is rapidly turning into the land of the privileged, and abusing the little guy is now an aggressive goal of the very same regulators who are paid to neutralize the power elite.

I, for one, will stop trading the day the COT report is no longer available, and I plan to do everything in my power to get others to join me.

Subject: COT report

As an individual investor, I review the COT reports on a regular basis to get a sense of what the "big boys" are doing. This is an important tool since these reports provide transparencies into the commodity supply/demand picture. We depend on the government to provide a level playing field in financial markets because that allows small investors to have confidence in the marketplaces. Your weekly release of the COT reports is an important contributor to that goal.

PLEASE KEEP THE COT REPORTS

Thanks

Lester Lee

Dear Sir : I find it increasingly hard to believe that the U.S, Government is not actively covering up Fiscal Malfeasance. The stoppage of the COT reporting will join the cancellation of the Treasuries M3 reporting in the apparently never ending cycle of denying usable Fiscal and Investing information to Tax Paying American citizens. There can be no rational reasons to cease publishing a report as useful as the Commitment of Traders. One can only imagine a need to cover market manipulations or price fixing as the beneficiaries to such a move. Please do not allow the COT publication to cease.

Regards,
Robert Fitzgerald

Please do not discontinue the weekly COT reports. I refer to them every week, track the data in a graphing program and follow third- party commentary on the reports religiously. They are of great importance to me as an individual investor.

In fact I would rather see them improved in two major ways:

- 1) More timely - the three day delay publishing data to Tuesday on Friday could surely be improved given the huge advances in data collection.
- 2) More transparent - identification of positions of major traders as has been done on TOCOM in a summary form.

Thank you.

Subject: cot reports

Dear Ms. Donovan:

Thank you and your department for publishing the weekly COT reports. Recently, I read the department is soliciting comments to complement a review of potential changes to the report. Without a doubt, you should publish what you know accurately and regularly. Weely publications seem to be a good compromise to reflect change versus other time periods. To discontinue publishing because the report does not present the full picture is unquestionably the wrong path to pursue. If incomplete information exists, interested parties will look to complete the picture. It should be your goal to assemble the information necessary that more fully reflects current situations- not stop publishing what you do know or can obtain.

I believe it is a good idea to regularly review everything, I would be shocked if this receives strong consideration to the discontinuance side. Ultimately, prices on everything catch up to reality. Better information moves us towards those levels quicker and with less volatility. With poor information, fear and greed move prices to much higher and lower extremes than they would or should be. It hurts everybody, breeds, distrust, causes irrational decision making and amplifies problems. Everyone is better served by prices ebbing and flowing to their appropriate price level as smoothly as possible.

Please consider expanding the COT report to include the gaps you feel are missing, not the opposite.

Thank you for your consideration.

Regards,
Frank

Subject: COT reports

To Whom it May Concern,

The COT reports should be updated and reported on a daily basis, not a weekly basis. The mere hint of elimination of these reports smacks in the face of government collusion with the big money boys. Twenty years ago I could see weekly reporting. This is 2006. Computers track everything on an up to the second basis. It would only take one little software program to run automatically to report who holds what and report this to the public on a realtime basis. The fact that the COT reports are still published only once a week and three days late already smells bad.

This is the age of information. I want more info not less.

There is only one reason for COT reports to not be updated on a real time basis. Most of the citizens that follow or trade commodities know the reason. Money is flowing from the commercials to the politicians in one way or another so they can continue to financially rape all other market participants.

It would be nice if my government would do the right thing for a change.

Subject: Retail/OTC Forex Trading in the USA a futures transaction or not

May I firstly apologise to have written to all of your respective departments as I felt the need to do so hoping that by law of probability I will be in contact with the right one and get the lead I need.

My enquiry relates to the ensuing Chapter 11 bankruptcy case of Refco FX Associates LLC in the Southern District of NY, which I am reasonable certain you are familiar with.

Without boring you with all the details, I read with interest the transcript of the 20th July relating to a motion put forward by Todd Duffy from Duffy & Amedeo LLP, for the ad hoc committee of Refo FX customers.

In the said transcript I noted that the Presiding Judge Drain referred to the nature of Retail Forex account holder as engaging in futures transactions by virtue of his statement **"These people were smart enough to engage in futures transactions"**.

As an investor from outside the USA (albeit a small investor) with due interest in this matter, I have been working on a document following through the process of this case and the investment climate in the USA for Retail Forex Traders from overseas and will like some clarification on the matter as it might relate to your respective department.

In my working documents I have come to note a fundamental gap between the interpretations "Futures Transactions" of the Judiciary system and that of the Executive Bodies like yours.

Given the inference in this case, am I right drawing conclusions that the lack of involvement of the futures regulators in the USA questions your reputation to protect investors in future transactions in the courts as it relates to Retail Forex Trading by virtue of difference in the interpretation of what construes futures transactions in the court of law?

I am aware and have read through over and over again such published documents as "Trading In The Retail Off-Exchange Foreign Currency Market: What Investors Need To Know" by the NFA and which I'll be referring to my working document, however the questions that still permeate through my research and yet to be resolved with the outcome RefcoFX account holders demise includes not least of them:

- ❑ Why the differences in regulatory treatment and protection of the Retail Forex Trade between the USA and Canada.
- ❑ Is there a case for Canada to specialise and build on its market international share in the Retail Forex Trade with the increasing convergence of Retail and Futures Trade having gained from the exposition by the RefcoFX Associate LLC case.

I will like my research document to be as fair as possible from the view of Retail Forex Trade account holders but thought the need to get further clarification from you knowledgeable selves in light of Judge Drain's recent statement.

Hoping to hear from the right contacts within your respective department, I once again apologise for sending this message at random.

Kind Regards

Archibald Graham

In response to your request for comments, I am deeply concerned that the CFTC would consider discontinuing such a popular and insightful report. While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. Certainly true hedgers should have their own category. In general, any modification must avoid discontinuing, suspending, or delaying the Commitments reporting. And the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Finally, I would request that if the Commission should decide to make changes that could negatively affect the continuation, continuity, or promptness of the COT report, that it submit such proposed changes for further specific public comment.

Subject: Petition for COT Report

To: secretary@cftc.gov
From: Ling-Zhi Hew, Singapore
Subj: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, than I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Dear Secretary,

Please kindly reconsider the thinking of elimination of the Commitment Of Traders. Rather the government should make the information more timely with shorter cycle time. Currently is one week time frame. If trader like me can see this information on a daily basis, it greatly make the market more efficient and transparent.

Thanks & regards,
leon

I am writing regarding your plan to eliminate the COT reports. I think we need to have more information not less as more and more individuals get into trading the futures markets. Freedom of information and information itself is the cornerstone of capitalist economics. Adam Smith would be rolling in his grave knowing that less information is being provided in a time when information is at our fingertips with the internet and instant communications. We should be provided more information and not less to even the playing field in the markets.

Subject: COT report

Dear Sir;

In response to your request for comments on the proposed changing or cessation of the COT report I would like to say that I use the report extensively.

I am an individual trader trading from abroad now for the last 7 years or so and the reason I choose to trade in the U.S. markets is because of the transparency. The transparency of your markets is due mainly to your reporting of participant's positions. I assume that I am not the only foreigner drawn to your markets for this reason.

I would not like to see the report stopped or changed at all. I think you would see a detrimental effect on open interest and liquidity in your exchanges if the report is materially altered or stopped. It is still very useful today in the form it is published (to me anyway, but I'm sure I'm not alone).

Subject: COT report

Dear Sir --

I do sincerely understand that in George Bush's America, the small investor and trader absolutely does NOT count. So in that spirit, I like to offer you some suggestions on how to push thru the current proposal to eliminate the publication of COT data. Let me say right off the bat, that I understand the intense time pressures you are facing. In November, if the current administration is voted out, you more than likely will not be able to get this proposal adopted. You may not be able to tilt the playing field so steeply that the little guys can be raped almost with no effort at all. Such an opportunity may not come again for years -- even decades -- if legislators even slightly honest are elected. So, while this has to be done expeditiously, the situation is delicate.

So looking at this, you've got to consider the public relations aspect of what you are proposing in light of the current set-up. Currently, insiders and institutions are the only ones privy to timely information. Essentially, they have a three day headstart on the investing public (aka, the targets). If the insiders and institutions can not fleece the public with this kind of headstart, concealing the information entirely from the public is definitely solid thinking -- but it may be going a step too far. Their ineptitude and your organization's efforts to help them may become apparent -- and garner the unwanted attention by industry press. If you are going to do this -- and I have no doubt that you will despite whatever protests you get from the investing public as they do not count any more -- I'd suggest you throw some sop to the retail investor. Announce you will publish the data once a year! Your ends will be achieved -- the playing field will be tilted so far in the direction of the insiders and institutions that the retail money will roll down the field and directly into the pockets of the institutions -- and you can still claim you are publishing information and serving the public! It will be a win-win for the CFTC!!!!!!

For me as an individual trader, I rely heavily on the COT report to assist me in my trading decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

Thank you for keeping our markets transparent with full disclosure to the public.

Regarding ending the Commitments of Traders reports. I use these reports for very important financial decisions I make for personal use.

In short, I would be lost without this - what I really need is for the information to be more up to date and more frequent than it is, not stopped altogether.

Thank you.

Subject: COT Report

To whom it may concern:

The COT Report is a valuable tool for those of us involved in the commodity markets. The possibility that the report may be delayed further or, worse, discontinued makes no sense whatsoever.

Actually, the report, timely as of Tuesday each week, should be issued the next day, on Wednesday, not on Friday when the data is four days old. With computers and other modern aids, we should be getting more and more timely data, not less.

Why in the world would the government want to hamstring commodity investors? President Bush is always talking about private enterprise and the small investor -- well, here is an opportunity to put words into action. SPEED UP THE RELEASE OF THE COT REPORT.

Sincerely yours,

J. M. Fullinwider

Hello,

First M3 goes Bye-Bye now the COT?

Investors need INFO! I used to think that it was just a crazy conspiracy talk that the markets were being manipulated for the large investment houses and the wealthiest investors.... now I'm beginning to wonder..

If the COT disappears its just one more nail in the coffin for small investors trying to make the markets work for them.... I'd strongly considering investing in overseas markets only if this continues..

Thank You

Regards

Vernon Bush

It is imperative that COT report continue to be published. This is an important market tool and there is no reason why it should be discontinued. What possible reason can CFTC give for discontinuing this report? The investing public is already fed up with the manipulation of the markets, which CFTC and SEC conveniently disregard. My fervent hope is that some day the people in charge at CFTC, answer for the corruption and manipulation which has caused large numbers of people to lose extremely large amounts of money. On second thought, discontinue the COT, and then the crooks and only the crooks, will know what is going on. It is almost that way now. Joseph Flannery jflannery5555bp@aol.com

Dear Secretary,

I am writing to express my objection to the proposal to eliminate the publishing of the COT report.

The COT report is a vital tool for the free market trader. I use it everyday when considering trades. It is about the only piece of data the Government puts out that I actually think is useful. So when I found out this information might be taken away happen I was very disappointed, but unfortunately not surprised at all. I find the growing propensity of the US government to walk all over freedom of information appalling.

By hiding key market info like the COT report, the marketplace is no longer level, and free market integrity is deeply in question.

I urge you to keep this report available to the public in its current form and distribution.

Subject: COT report

Dear Secretary,

today i get the information, that you will stop the COT report from August. This information is very interesting for me, my company and the public.

I don't understand your specific reasons and i hope you will NOT STOP THIS REPORT.

The other specific question is the time gap, between the REPORT and the reported numbers. Today it should be possible to report them Saturdays or Sundays with the numbers from the Friday CLOSING. With computers, Excel and Email it should work much faster than 20 years ago.

You will lost one of your best products and in my opinion a lot of your credibility. In a time where information is very improtant to survive against othe countries and companies, it is more a step back than a steo into the future.

Subject: COT report

In response to your request for comments about the COT report, I am concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

Thanks!

Eileen Donovan,
Acting Secretary, Commodity Futures Trading Commission
Three Lafayette Center
1155 21st Street, NW.
Washington, DC 20581

Ms. Donovan,

This writing is in response to the CTFC request for comments on the Commitment of Traders (COT) reports, and possible changes to their scope.

The COT reports provide useful information that help level the playing field between the large insiders, and traders and investors in general. The need for such leveling varies from minor, in certain quasi-free markets, to barely adequate, in the most heavily manipulated markets.

The utility of COT information is without question:

" The information shows the concentration of positions that can be used for manipulative purposes. Silver investors, in particular, are much more wary based on the COT data showing the mind-bending concentration of the large commercial entities that the CTFC allows there.

" COT data can also expose perfidious behavior, as when Goldman Sachs apparently advised its clients to sell off their gold positions in 2006 to cover its own trading losses in gold shorts on the TOCOM (see <http://www.financialsense.com/fsu/editorials/kirby/2006/0111.html>, and <http://www.financialsense.com/Market/kirby/2006/0313.html>).

I recommend that COT reporting be made

- " more automatic,
- " more electronic,
- " more inclusive,
- " to report entities by name,
- " more frequently,
- " with less latency, and
- " with upgraded on-line archives (to include the spot price at the time of the report as a field).

After Goldman's embarrassment in Japan, the TOCOM moved to eliminate COT reporting. Problem solved! But is the real problem the embarrassment of the wealthy few, or the failure to protect the honest many from perfidy and manipulation? The CTFC's action with regard to its own COT reports will show its true colors.

Respectfully yours,
John M. Holford
Oakton, Virginia

Subject: COT reports

Dear Members of the CFTC.

Please reconsider halting the publication of the COT report. Although minor investors may not understand the need for this report, it provides essential data to those traders in the commodities area. It is in the best interests of the government to allow its citizens to use any means of data to further their livelihood, thereby providing a higher tax base with which our government can procure taxes from said individuals. This report not only gives jobs to the individuals writing and researching the report, it also provides that much needed data to those in a lucrative industry.

Thank you,

Beth Rose

Subject: COT Reports

Dear Secretary,

This report is vital to those who make commodities trades.

Taking this information away gives insiders an advantage and makes it almost impossible for the traders to secure that information. This tilting of the table in favor of insiders and others that would benefit by the withholding of this information casts doubts toward the integrity of cftc.

Why is this being considered when we are hitting a down turn in over all stock value and the pending housingmarket will take away additional monies that can not be replaced.

So please reconsider your action on the COT Reports and their value to the Commodities Traders to make informed trades as the emergence of China is making an impact on all commodities.

Thank you for your consideration of my request on this very important matter.

Dear Sir or Madam,

I was completely dismayed to learn the CFTC was considering no longer publishing the COT reports. Small investors operate at a terrible disadvantage in these markets. The one tool at our disposal that actually gives us useful and timely information is the COT reports. I strongly urge you to continue publishing these numbers and making them available to the public. In fact, shortening the delay time before their release would be a huge help for small investors trying to exist on an uneven playing field. Doing away with the reports would be comparable to the government no longer publishing CPI and PPI numbers.

Regards,

Thomas M. Piljac

JUL 21 2006
COT OF THE COMMISSION

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public

OFFICE OF THE SECRETARY

Dear Sir,

I have been informed that you may stop publishing the COT report and are inviting input from the public before August 20th.

Once again, I am deeply dismayed by yet another reduction of data accessible to the public from the government. My hope is that this is only an internet myth, a silly rumor. The advent of computers and the internet should make publication of data less burdensome not more. Didn't we just go through this when similarly pathetic reasons were floated to justify discontinuance of M3 publication? Our government by the people, for the people seems to be waging war against the greater transparency the internet and computers are forcing upon it. This shouldn't be!

This is willful withholding of information from the public, with clear ulterior objectives. This is just one more step in a long series of steps to suppress information and manipulate markets for the benefit of those who retain access. To say it interferes with free markets is obvious, but then there are very few left that believe in that fairytale. This is a disgrace, but I have hope that these decisions are increasingly being recognized for what they are.

I've recently read an entire book on how to use the COT report for investing. I wonder if the purchase price is refundable.

OFF. OF THE SECRETARIAT

To whom it may concern,

I am very disappointed to hear talk of eliminating the reporting of the COT data. At a time when data are easy and cheap to gather, we should have more, NOT LESS, data. It seems the SEC, the CFTC, the Fed, and various other government agencies are acting to restrict the flow of information. Many people are upset about the cancellation of M3 reporting and fear the same will happen to COT data. Please do not let this happen!

COT reports come out on Friday and are reflective of positions as of Tuesday. In this electronic age, this information should probably come out once a day, or at least with a one-day time lag.

The same holds even more for short reports. Short reports come out once a month. These should be released at least once per week. By the time the data does come out, it is quickly outdated and useless because of the time lag. One wonders if the intent is to make the data as useless as possible.

I suggest a complete revamping of the COT data so that it is reported more current and frequent and readily available to all who would like this information.

Subject: COT Report

RECEIVED
JUL 24 11:12
OFF. OF THE SECRETARY

As an individual trader, I use the COT report to assist me in making market decisions.

I am concerned that the CFTC would even consider discontinuing such a popular service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

Changes that you are considering should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Dear Sirs,

It is my understanding that there is an upcoming hearing regarding the publishing or release of the Commitments of Traders reports. I would like to see the results released on a daily basis rather than weekly. This information is very useful to the independent trader who is otherwise at a great disadvantage to the institutional investor. It should not be a problem in today's electronic era to allow this information to be released more quickly and more often.

Thank you,

Stan Scott

Subject: COT report
Attachments: 072106-a.gif

Mr. Secretary, CFTC:

This letter is written to affirm the importance of the COT Reports and to state:

NO! Please DO NOT discontinue the COT Reports.

The weekly COT Reports are the ONLY means that a small trader can level the playing field with the large entities trading the futures markets. If you were to take away the COT Reports, you would be making futures trading extremely uneven, compared to the commercials with their inside information and the large specs with their huge research budgets and staffs.

The COT Report is mandatory to allow the small traders information crucial to their very trading existence.

Enclosed is a gif of how small speculators may level the playing field with the large traders and commercials. It is from an inexpensive service, timingcharts.com [with which I have no affiliation]. The gif shows the application of a momentum oscillator to the net position data of gold which was very useful to see what the commercials and large traders were doing at the time. By noting the strong relative net long positions of the commercials and the weak relative net long positions of the large traders in March and June of this year, it gave me the information I needed as a small trader to make profitable trades. It gave me information that the commercials already know and which the large traders can infer by their positions on the floor of the futures exchanges.

Please do not discontinue the COT Reports, as they are the only way that small traders can compete with the large traders and commercials.

Thank you.

Respectfully,

Donald M. Roos

Dear Sir or Maddam,

I am writing in response to your request for input regarding the COT reports. I agree totally with Ted Butler. The reports are valuable and will hopefully continue. They are the most important data published by your agency and to terminate them would be harmful to the public interest.

I have one specific suggestion for improving the report, namely, that you include spread data in the commercial category, like is currently provided in the non-commercial category. This will provide greater transparency in determining the true nature of the commercials' holdings.

If this change was adopted, it would then become optional as to whether you added spread data in the non-reporting category, or left it to the reader to compute this amount.

Further, if adding commercial spread data proved too cumbersome or complicated in the futures/options combined long form report, a futures-only change would be a great improvement and would be greatly appreciated.

Thank you for the opportunity to comment

To whom it may concern,

I understand that the Commodities Futures Trading Commission may stop publishing the Commitment of Traders report. Please do not let this happen. The COT is a very valuable tool for traders, myself included, in gauging the markets. M3 has already been done away with and now this? Is there a concerted effort to keep information from the public? This is wrong and should not happen.

Please do not stop reporting COT data.

Thank You,

David Jorgenson

Subject: COT Reports

What could be the rationale for eliminating the COT report?

If anything, with information so much more readily available on short notice, the COT report should be retained and disclosed more often and in more timely fashion than it has been.

Please do not take away the COT report. It is one of the only reports which can be of some use to retail traders like myself.

I would like to request that the COT report be available to the public on Wednesday morning each week instead of Friday afternoon. The 3 day delay in the report gives the manipulators too great an advantage not to mention their illegally large positions that go unprosecuted by regulators. The CFTC is supposed to protect the public from manipulators but are instead protecting the manipulators from the public when information is delayed or not reported at all. Isn't this close to fascism and tyranny? How can we have free markets when government regulators protect the criminals and allow them to destroy investors and companys with impunity? And how can the CFTC even consider eliminating the COT report? There will be a revolution if you do.

Subject: Improve Openness and reporting- don't sabotage it--COT reports more often, not less
Importance: High

We need more frequent reporting, and more openness reporting to prevent the run-away fraud occurring in the financial establishments (and government).

I am very disappointed to hear talk of eliminating the reporting of the COT data. At a time when data are easy and cheap to gather, we should have more, NOT LESS, data. It seems the SEC, the CFTC, the Fed, and various other government agencies are acting to restrict the flow of information. Many people are upset about the cancellation of M3 reporting and fear the same will happen to COT data. Please do not let this happen!

COT reports come out on Friday and are reflective of positions as of Tuesday. In this electronic age, this information should probably come out once a day, or at least with a one-day time lag.

The same holds even more for short reports. Short reports come out once a month. These should be released at least once per week. By the time the data does come out, it is quickly outdated and useless because of the time lag. One wonders if the intent is to make the data as useless as possible.

I suggest a complete revamping of the COT data so that it is reported more current and frequent and readily available to all who would like this information.

Subject: COT Report

I am a small Forex trader and use all the tools and information I can access in an attempt to predict future market trends.

Naturally I was distressed to learn that one of my favourite sources of information, COT data, may be axed. As it is the data is vague, being issued only once a week. What I would really like to see is the COT data being available daily rather than weekly - but certainly weekly is better than nothing, as it gives us little traders some idea of where the big money is going, and therefore a chance to be on the same side.

And so I want to add my voice to what I'm sure will be an avalanche of complaints about the possible axing of COT. We want & need MORE information, not less, in order to make a living from the markets.

I should add that I am an aged pensioner, and rely on the market to supplement my meagre income.

Yours Sincerely,

Subject: OBJECTIONS TO DISCONTINUING COT REPORT

RECEIVED
 JUL 21 2006 11:54:22
 CFTC OF THE COMMISSION

As an individual trader, I rely heavily on the COT report to assist me in making market decisions. I WILL CEASE ALL TRADING, MY OWN ACCOUNT PLUS THE MANAGED ACCOUNT ACTIVITIES SHOULD THE CFTC NOT PUBLISH COT DATA!!!! NOT PUBLISHING THE COT DATA WILL UNLEVEL THE PLAYING FIELD!!

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

By hiding key market info like the COT report, the marketplace is no longer level, and free market integrity is deeply in question. I for one plan to write to Congress, the CFTC, NFA and even the President to express my objection to suppression of information.

What would be the purpose for not publishing this information? We all know the real answer, but the question is what will they say? If we want to have our free market system then we must fight for it.

Max Asare

COT OF THE CASH MARKET

To Whom it May Concern,
Please do not discontinue the COT report. It is perhaps the most useful piece of information available to a trader that gets published. If anything, COT reports should be made available in a more timely fashion. Elimination of this report would damage free markets.
Thank you,
Jordan Roumieu

We object to discontinuation of the COT report.

INSTEAD, the COT Report should be issued on a DAILY BASIS.

The US govt is heading in the wrong direction by eliminating /reducing info to the public instead of pursuing TOTAL TRANSPARENCY by giving MORE INFORMATION to the public on a timely basis.

This is BUSH's personal and the agenda of the "corrupt supporters" of the Republican Party. We reject it and are against it.

MORE TRANSPARENCY AND PUBLIC INFORMATION IS REQUIRED NOT LESS.

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions. I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Reports

RECEIVED
2006 JUL 21 AM 10:10
OFC. OF THE SECRETARIAT

CFTC Secretary:

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, than I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

N. Ali

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

2006 JUL 24 11:10:16
OFC. OF THE SECRETARIAT

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Yours Sincerely
Jeff Watson

Subject: COT Report

CONFIDENTIAL
COT REPORT
CFTC REPORT

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

Dear Sir,

As an individual trader I rely heavily on the COT report to assist me in making market decisions. In fact, the most important part of my investment analysis involves the use of it. To loose the COT would have severe repercussions on my trading strategy. I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service.

The report has been the subject of over 40 University studies and two best selling books. While the report may need modification the number and size of exemptions granted by the Commission would seem to demand more transparency not less. In general any changes should not result in discontinuing, suspending or delaying the Commitments report and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference the report becomes nearly unintelligible.

Please also correct the hedger data under which the Commission rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer it can operate without position limits and the position is categorized as a Commercial under the guise that the swap dealer is now a bona fide hedger. If the Commission cannot see that this is the same speculative money then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world. Thank you for keeping our markets transparent with full disclosure to the public and providing such a valuable service via the COT.

Best regards,

S Cranmer

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less.

In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT reports

The Commitments of Traders reports are an integral part of my business. I use them for analyzing markets and making trading decisions. I am a small sole proprietor helping my clients to make intelligent and informed decisions. The "big" players in the commodity markets have ready access to far more information than I – the COT report helps to level the playing field by disclosing the relative positions of various market participants.

As an analogy, suppose you were playing poker but you only knew the total size of the "pot" and how much your "call" would cost you. You weren't allowed to know WHO had bet HOW MUCH or WHAT cards they had showing. How fair would that be?

I can think of only two reasons to consider abolishing this report: (1) if it were costly to produce and no one was using it very much anyway and (2) somebody with superior market information is trying to "unlevel" the playing field.

- (1) is surely not true as many people, especially individuals such as myself, are using the data. In fact, in this day of electronic globalization, it would be especially useful if the report were released more than once a week and with less lead time. As it is "big" players already are "gaming" the report by taking positions after the Tuesday cut-off which means I won't know about it for over 10 days until the following Friday. So much of the time I'm already acting on "stale" data. To do away with the data altogether would be devastating. The CFTC is here to help market liquidity and fairness – abolishing the COT report would do the opposite.
- (2) If (2) is the driving force behind abolishing the COT report ... well, that's just unconscionable.

Thank you for the chance to share my thoughts.

Subject: COT REPORTS

To Whom It May Concern:

Please continue to report the COT reports. Transparency is vital to investor and public faith in our markets. The suppression of the M3 reports has shaken my belief that our data and our markets are not "rigged". The concealment of the COT reports will further weaken my confidence in committing capital to US capital markets.

Please reconsider the suppression of information necessary for confidence in our markets.

Thank you.

To whom it may concern:

I wish to voice my strenuous objection to the proposal on the part of the CFTC to eliminate the weekly COT report. This is one of the few government reports that actually provides useful information to investors and provides a level playing field for all investors large and small.

My question is this: Why would the CFTC even consider eliminating this report? It makes absolutely no sense to me!

PLEASE DO NOT ELIMINATE THIS REPORT!

Regards -

Subject: COT Report

I understand the CFTC (Commodities Futures Trading Commission) has indicated that they may stop publishing the all important Commitment of Trader Report, pending input from the public.

As an individual trader, I along with many traders influenced by Larry Williams trading methods, rely heavily on the COT report to assist me in making market decisions.

The COT has been cleverly built in to charting software, by Genesis, an American software company.

It provides an easily used indicator for analysing stocks & futures, and gives the American software company a distinctive advantage marketing it's software world wide.

It is very popular with students of Larry Williams a well known American trader and I know off many and growing number off fellow Australian traders who are purchasing this American software and relying on the easily accessible COT data and greatly appreciate the insight & transparency it provides for considered market decisions.

The COT Report is the only report that tells you where the commercial traders are putting the BIG money into the market. It lets you see where commercial investors believe the best opportunities are in relation to where the smaller investors are putting their money.

Many small speculative are beginning to trade the futures market and it would be a shame to remove the COT which helps assist this phenomenon to provide valuable market depth and liquidity.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

Yours Sincerely

Robert Riddell

Australian Share & Derivatives trader

OFFICE OF THE SECRETARY

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. The Enron fiasco demonstrated the need for increased transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

The COT report information cut-off is a Tuesday, but is released on Friday. It would be more useful if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

U.S. DEPT. OF THE TREASURY

To: secretary@cftc.gov

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, than I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: Subject: COT Reports

2006 JUL 24 AM 10:45
OFC. OF THE SECRETARIAT

Dear Sir/Madam

As an individual trader, I rely heavily on the COT report to assist me in making market decisions. In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. The Enron fiasco demonstrated the need for increased transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

The COT report information cut-off is a Tuesday, but is released on Friday. It would be more useful if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Yours faithfully

Andrew McKenna.

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, than I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,

John Popek

Subject: COT Report

2006 JUL 24 AM 10: 41

OFC. OF THE SECRETARIAT

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am shocked that the CFTC would even consider discontinuing such a popular and insightful service, particularly in light of the SEC's need to ... re-evaluate, its policies regarding disclosure and transparency after the downfall of Enron, Worldcom, the AIG manipulations scandal, etc. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

Subject: COT Reports

RECEIVED
COT

2006 JUL 24 AM 10:13

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service.

Your own site shows close to 500,000 users last year.

The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less.

The Enron fiasco demonstrated the need for increased transparency, not less.

In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report.

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data.

Absent historical reference, the report becomes nearly unintelligible.

The COT report information cut-off is a Tuesday, but is released on Friday.

It would be more useful if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,
Michael Sanders

CFC. OF THE SECRETARIAT

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

John Price

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely
Everaldo Cumberbatch

Subject: Cot Reports

To whom it may concern,

As an individual trader, I rely heavily on the COT report to assist me in making market decisions. In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. The Enron fiasco demonstrated the need for increased transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

The COT report information cut-off is a Tuesday, but is released on Friday. It would be more useful if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Regards

Stephan Marks

Subject: COT Report

Hi
The COT is very important

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books. While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible. PLEASE ALSO CORRECT THE HEDGER DATA Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers. I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world. Thank you for keeping our markets transparent with full disclosure to the public.

To Whom it May Concern,

As an individual trader, I was surprised to hear that the CFTC was considering discontinuing one of the most insightful and valuable tools available to traders. I rely heavily on the COT report to assist me in making market decisions. Even your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

Please continue publishing the reports. They are a valuable tool not only for me but for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,

Terry Curtis

CFC OF THE SECRETARIAT

Dear CFTC,

As an individual trader, I must say current market conditions and my personal limits of time and resources make it very difficult to be a successful trader. Hedge funds, commodity producers, commodity buyers, speculators, and large brokerage houses move large volumes of money with speed and the advantage of immediate execution - it is extremely challenging to stay out of the way of these almost daily stampedes in and out of positions. With all of the electronic exchange of information between those organizations and the trading floor, surely there is a way to actually improve the public availability of data. Improving the frequency and detail of the positions taken by the large traders would help people at my level maintain some hope of making decisions that could lead to successful outcomes.

COT reports are somewhat dated when they come out but they still help me and my advisors make decisions. If you are looking for Comments, my request would be to increase the communication to daily reports rather than weekly. The short reports are nothing more than history lessons by the time they come out so please don't reduce or eliminate the COT reports.

Thank you for taking time to gather comments.

Subject: COT Report

206 JUL 24 AM 10:14

OFC. OF THE SECRETARIAT

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

As an individual trader, I rely on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

2006 JUL 24 11:16:20
REC. OF THE SECRETARIAT

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." Subject: the COT Report - very important

To Whom It May Concern,

I am an individual trader and I use and value the COT report for my trading data and market decisions. I am concerned that the CFTC is thinking about discontinuing this critical and important report. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

I understand that the report is not 100% accurate and has its flaws but the number and size of exemptions granted by the Commission would seem to demand more transparency, not less.

In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

To Whom it May Concern:

I am an individual who uses and relies upon the COT report to enhance my forex trading decisions. I understand that there is talk of eliminating the publication of the COT report. The loss of this valuable tool will be extremely detrimental to my efforts as a trader.

Please do NOT discontinue, delay, suspend, or otherwise disrupt the release of the COT report; it is a vital component of many traders' strategies.

There are enough opportunities to lose money in the spot forex market; I implore you to NOT interfere with one of the really useful tools we presently have, namely the COT report. I find it difficult to believe that the release of the COT report has any detrimental effect on the commercial traders... they rule the market, after all. Are they really so greedy that they are compelled to take this one small helpful crumb away from the small individual traders out here who rely on it?

Thank you for your consideration in this matter, and I sincerely hope that this issue will be resolved and that the COT reports will continue to be released with such form and substance as to continue to be a meaningful addition to individuals' trading strategies.

Sincerely,
Jean Lake, a very concerned forex trader

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, than I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,

Michael Tarrasky

secretary

I rely on the COT report for making market decisions since I am an individual trader

I am deeply concerned that the CFTC would consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

The report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency; not less. I suggest any changes not result in discontinuing, suspending or delaying the Commitments' report, and the Commission needs to take precautions when implementing report changes in such a way as to maintain continuity with historical data. The absents of historical reference -- the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules, a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." This is the same speculative money. I would prefer it be listed under a separate category and reserve the hedger category for traditional hedgers.

I request you continue publishing the reports. They are valuable tools for investors like me around the world.

Full disclosure to the public keeps the markets transparent.

Sincerely,

Tiffin, OH 44883

Mark Ziegler

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Regards Marcel R Hebert

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,

Rolf B. Crapo

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. The Enron fiasco demonstrated the need for increased transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

The COT report information cut-off is a Tuesday, but is released on Friday. It would be more useful if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Subject: COT reports

Folks

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year.

The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. The Enron fiasco demonstrated the need for increased transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report.

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

The COT report information cut-off is a Tuesday, but is released on Friday.
It would be more useful
if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. Investors throughout the world consider these a valuable tool.

Thank you for keeping our markets transparent with full disclosure to the public.

Yours P.Ginman

Subject: COT Report

To Whom It May Concern:

As an individual trader, I rely heavily on the COT report to assist me in assessing market condition and making trade decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,

Tony Huang

Dear CFTC,

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Sincerely,

Mike Bryarly

I am confident that the US market would continue to be the most sophisticated one all over the world because of CFTC activities.

I hope to be continuance of the practice heretofore followed of the COT report

Thank you for keeping our markets transparent with full disclosure to the public.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. The Enron fiasco demonstrated the need for increased transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

The COT report information cut-off is a Tuesday, but is released on Friday. It would be more useful if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.
Thank you for keeping our markets transparent with full disclosure to the public.

Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, than I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." Subject: COt Reports

To secretary@cftc.gov As an individual trader, I rely heavily on the COT report to assist me in making market decisions. In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. The Enron fiasco demonstrated the need for increased transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible. The COT report information cut-off is a Tuesday, but is released on Friday. It would be more useful if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world. Thank you for keeping our markets transparent with full disclosure to the public.

Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, than I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Reports

Eileen Donovan, Acting Secretary
Commodity Trading Futures Commission

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

In response to your request for comments about the COT report, I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. The Enron fiasco demonstrated the need for increased transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report.

The Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.

The COT report information cut-off is a Tuesday, but is released on Friday. It would be more useful if the data were released on the same day as the cut-off.

A problem that needs clarification is with the hedge fund: it can be categorized as a Commercial trader without position limits by using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Subject: COT Report

Dear Secretary,

I am an individual trader and use the COT report as an integral part of my decision making about the market.

I am very disturbed that the CFTC would even consider discontinuing such a popular and insightful service. I understand that your service has been used by close to 500,000 users last year and that the report has been the subject of over 40 University studies and two best selling books.

I value the service you provide and would encourage you to not only keep it but to make some additional changes for the better, such as more accurately identifying hedge fund buying which currently can be disguised as commercial through using an intermediary swap dealer.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Thank you,

Dr Roman Lohyn

PLEASE ALSO CORRECT THE HEDGER DATA

Under the Commission's rules a hedge fund buying futures contracts is listed as a speculator and is subject to position limits. However, if the same hedge fund acts through an intermediary swap dealer, it can operate without position limits, and the position is categorized as a Commercial under the guise that the swap dealer is now a "bona fide hedger." If the Commission cannot see that this is the same speculative money, then I would prefer to see it listed under a separate category and reserve the hedger category for traditional hedgers.

I urge you to continue publishing the reports. They are a valuable tool for investors throughout the world.

Thank you for keeping our markets transparent with full disclosure to the public.

Thank you,

John DeVault

Subject: COT Report

As an individual trader, I rely heavily on the COT report to assist me in making market decisions.

I am therefore deeply concerned that the CFTC would even consider discontinuing such a popular and insightful service. Your own site shows close to 500,000 users last year. The report has been the subject of over 40 University studies and two best selling books.

While the report may need modification, the information is used in several areas of the business and education.

While the report may need modification, the number and size of exemptions granted by the Commission would seem to demand more transparency, not less. In general, any changes should not result in discontinuing, suspending or delaying, the Commitments' report, and the Commission should take precautions to implement report changes in such a way as to maintain continuity with historical data. Absent historical reference, the report becomes nearly unintelligible.
